About the Author

Denise Sutherland is an Australian syndicated puzzle author. She has a background in science and graphic design and is a professional member of the Australian Society of Authors. She is also an established artist and classically trained musician.

Denise has always been interested in mysteries and puzzles. As a child she was captivated by the *Encyclopedia Brown* books, which lead inevitably on to the works of Joan Aiken, Georges Simenon, Colin Dexter, Reginald Hill, P.D. James, and many others; murder mysteries are still her favorite genre, along with anything by Terry Pratchett.

There is no official training to become a puzzle writer. It's an unusual mix of skills: a fascination with words, numbers, puzzles, logic, and patterns; an ability to deconstruct and then reconstruct puzzles; and years of practice. Denise started writing puzzles for her younger sisters and brothers when she was young but got serious about teaching herself to write crosswords and other puzzles when her own children were little, in the late 1980s.

Denise has run her own graphic design business, Sutherland Studios, since 1997; however, she now concentrates almost solely on puzzles.

She has written puzzles for many groups, from home schooling groups, regional Slow Food organizations, and the Australian Science Archives Project to the Australian sugarcane industry and Capital BlueCross (USA). She has several syndicated puzzle series, including her unique Secret Shape word search puzzles. Her puzzles are published in a wide variety of newspapers and magazines in Australia and around the world.

Denise has researched, written, and illustrated three themed puzzle books for several organizations (the Royal Flying Doctor Service of Australia, the Alice Springs School of the Air, and the Royal Society for the Prevention of Cruelty to Animals), and two books on the history and heritage of her hometown, Canberra (the national capital of Australia).

Denise has lived in the States at various times in her life, in New Haven, Connecticut; Tucson, Arizona; and Boulder, Colorado, and currently lives in Canberra with her astrophysicist husband Dr. Ralph and their kids Rodger and Jenny. She is a completely obsessed knitter, and also enjoys BookCrossing, cryptic crosswords, Middle Eastern dancing, and watercolor painting.

You can visit her Web site for free puzzles and knitting patterns, and to see her paintings (`sutherland-studios.com.au`).

Dedication

To be cut in half and shared equally:

For my husband Ralph, whose support, silliness, programming skills, and love I rely on utterly. Yours forever.

For my dad Barry, who got me on this puzzling path in the first place. You can blame him.

Author's Acknowledgments

First of all, a special thank-you to Natalie Harris at Wiley for making this book happen for me in the first place.

I have loved every minute of working with my Wiley team in Indianapolis. A heartfelt thank-you to Sarah Faulkner, Erin Calligan Mooney, and Megan Knoll for making this such an enjoyable experience. Their collective intelligence, enthusiasm, and professionalism are matched only by their warmth and senses of humor.

Writing a book with an author half a world away is no easy task, but these women made it seem effortless. My early morning e-mail chats with Sarah (4 p.m. for her was 7 a.m. for me the next day) kept things moving along and were great fun.

I couldn't have asked for a better Technical Editor in Raymond Hamel — his meticulous eye was invaluable.

A true blue Aussie "thanks mate" to Rachel "MadMad" Wohanka for her American insights.

I couldn't have written the puzzles in this book without *Project X,* one-of-a-kind software written by my husband Ralph that helps with the construction process. He refines and expands it when I ask nicely. I am in awe of his remarkable skills and eternally grateful for the time he has taken off from his day job (theoretical astrophysics) to write code for me.

To end with the most important, my endless love and thanks to my dear family — Ralph, Rodger, and Jenny — for all the cups of tea, words of encouragement, making sure I took breaks, and keeping me laughing while writing this book.

Publisher's Acknowledgments

We're proud of this book; please send us your comments through our Dummies online registration form located at `http://dummies.custhelp.com`. For other comments, please contact our Customer Care Department within the U.S. at 877-762-2974, outside the U.S. at 317-572-3993, or fax 317-572-4002.

Using a computer 422
Writing it out by hand 423

Introduction

Humans are a funny bunch. As in funny *ha ha*. We have had an enduring love of fooling around with language probably since words existed. The ancient Babylonians wrote riddles, as did the Persians, Arabs, and Greeks. The Romans especially loved a good acrostic. Anagrams, puns, tongue twisters, and other wordy diversions have been around for hundreds if not thousands of years across all languages.

The last hundred years or so have seen a huge explosion in word games, including the notable invention of the crossword puzzle. Everyone has played I Spy, Hangman, or Scrabble and told truly dreadful puns (or is that just me?). There seems to be no end to the appetite for puzzle books (from pocket sized to jumbo collections), not to mention online puzzles. Many cellphones even have word games, so you don't have to be without your puzzles for an instant!

Word searches are a significant part of this wordy world. Although not everyone considers them "serious" word puzzles, they may be even more popular than crosswords.

About This Book

I've written this book in part to help raise the humble word search to its rightful place. I share a little history, explain how best to solve word searches of different types, and reveal some of my secrets on how to write your own.

But don't forget the puzzles; they're the main reason you picked up this book at all, and my favorite part of the book, too. This lovely volume contains more than 250 brand-new word search puzzles, from your run-of-the-mill word search to seven other variations. All the puzzles come in Easy, Medium, and Hard levels, and have been carefully handcrafted — no computer-generated puzzles here!

Whether you're doing these puzzles to help stay mentally on the ball (more on that in Chapter 1), or just to chill out and relax on vacation, I'm sure you'll enjoy what follows. Trust me; after all, I'm a puzzle writer — would I lie to you?

Conventions Used in This Book

I use a few conventions in this book to make it easy for you to navigate:

- I use *italics* to introduce new terms, and then I define those terms.
- The keywords for bulleted lists appear in **bold** text. Bold also denotes the list words in the Story Word Searches in Chapter 4.
- I used the *New Oxford American Dictionary,* 2nd Edition (Oxford University Press), as my standard reference in writing these puzzles.
- A couple of chapters give you some Web addresses to online resources. To make these URLs easier to spot and read, they're printed in `monofont`.

  Also, during the layout of this book, some Web addresses may have needed to run across two lines of text. If that has happened, rest assured that I haven't put in any extra characters (such as hyphens) to indicate the break. So, when using one of these Web addresses, just type in exactly what you see on the book page, pretending as though the line break doesn't exist.
- The *word list* is the list of words appearing next to or underneath the puzzle. These are the words you need to find in the puzzle.
- The *letter grid* is the puzzle grid formed of letters. This feature is usually square, but it may be in a different shape on occasion.
- In the Hints section (Chapter 12), I refer to positions in the letter grid by using a coordinate system, like in the game Battleship. The first coordinate (the letter) is the column position (horizontal axis), and the second coordinate (the number) is the row position (vertical axis). So a hint such as "CHIHUAHUA starts at (J, 3)" indicates that the first letter in CHIHUAHUA is at the intersection of the tenth column and third row of the puzzle. I give you more detail about this subject in Chapter 12.

In addition, I use this difficulty rating system for the puzzles:

- **Easy:** Most of the Easy puzzles in this book are very straightforward, and have the smallest grids. The words in the letter grid don't have a lot of overlapping letters or as many backward or diagonal words. I also use a simpler vocabulary for these puzzles so that the words are hopefully ones you're familiar with.
- **Medium:** The Medium level puzzles are larger, have words that overlap each other more, and use more diagonal and backward words. The word lists contain more difficult words, which are generally harder to find.

- **Hard:** The Hard puzzles have the biggest grids and much more difficult words to look for: foreign vocabulary, unusual terms, place names — basically, words you may need to look up in a dictionary. The words appear in all directions, and of course these puzzles have more backward, short, and overlapping words than the Easy and Medium puzzles. These Hard puzzles often have an extra twist to them, such as extra words in the word list or jumbled hidden words. I let you know when a puzzle contains one of these extra challenges.

What You're Not to Read

You can skip all of Part I and just head right on over to whichever puzzles you want to have a go at first! The Part of Tens chapters in Part V are also additional information not essential to the puzzles.

When you come across the occasional sidebar, you can safely ignore it as well. These shaded boxes contain some interesting snippets of information from the world of word puzzles, but they're not central to the main book.

Foolish Assumptions

Word search puzzles have such a wide appeal and are so accessible to everyone that all I'm assuming is that you can read English — you don't even need to have a wide general knowledge or know how to spell well to do most of the puzzles in this book.

I do hope that you have an interest in words and are keen to have some relaxing fun. Perseverance is the main quality you need to solve all the puzzles. And a sense of fun — none of this nonsense needs to be taken seriously!

I suppose you may have some ulterior motives, such as improving your vocabulary or staying mentally active, but I won't let that get in the way of serving you up a whole heap of fun puzzles!

How This Book Is Organized

This is mainly a book *of* word search puzzles, not a vast amount of writing *about* them. That said, a couple of its sections do introduce and explain this puzzle genre and give you some fun resources such as letter frequency lists and even instructions on how to write your own word search!

Part I: Working with Word Searches

This part gives you a little background history of word searches and a quick rundown of the benefits of solving puzzles. It also describes each of the eight word search varieties I give you in the book, plus some anagram and word games.

Part II: Starting with Straightforward Puzzles

This part contains heaps of straightforward word search puzzles: Simple Word Searches, Story Word Searches, Hidden Words, and Secret Shapes. These varieties are the sort you're most likely to be familiar with from newspapers and magazines, so they shouldn't make your brain hurt (too much).

Part III: Moving On to Complex Puzzles

The chapters in Part III contain a collection of devious word searches — Scrambled Words, Quiz and Secret List Word Searches, and Winder Words — and other anagram-based word puzzles. I think I can fairly say that these puzzles *are* likely to make your brain hurt. But in a good way.

Part IV: Hints and Answers

This part is the one to turn to if you need a little help along the way (or need to resort to the answers before you tear your hair out). Chapter 12 contains a hint for every single puzzle in the book; I encourage you to check out these hints before turning to the answers. Chapter 13 has the answers to all the puzzles, with full grids so you can see where each word is placed in every puzzle. Avoid this last chapter for as long as possible; I don't advocate ripping the pages out of the book or taping them together, but you get the idea — be strong!

Part V: The Part of Tens

This part shows you useful letter pattern tips that I hope you find invaluable in your puzzling adventures, both in this book and further afield. It also gives you a rundown of the benefits of doing word searches, some of which may surprise you, and a set of tips on how to write your own word search with only some graph paper and a pencil.

Icons Used in This Book

I use a few icons throughout the book to emphasize important information. This is what they look like and what they mean:

This icon alerts you to a handy hint or tip that may help in solving the word search puzzles or other wordy games.

When you see this icon, take special note! This icon highlights information that's especially good to remember when solving these puzzles.

These warnings point out common pitfalls you may encounter when solving word puzzles.

Where to Go from Here

You don't have to read this book from start to finish like you would a novel. Although you *can* do it this way, of course, you can also dip in and out as the mood takes you. Each section stands alone; one chapter may be connected with another, but I always give you a cross-reference if that's the case.

If you want to know a little more about word search puzzles in general or find some solving hints and descriptions of the puzzle varieties in this book, head over to Part I.

If puzzles are what you want — and make that *now* — hightail it to Part II to get right into the word searches. To start with a challenge, go straight to the complex puzzles in Part III.

And if want to read about the benefits of doing word search puzzles or write one of your own, check out the Part of Tens chapters in Part V.

All I ask is that you avoid Chapter 13 (you know, the answers) for as long as possible (whether that's ten minutes or ten days). Give the puzzles a good try before resorting to this part of the book.

Part I

Working with Word Searches

"Buffalo? No, the word 'buffalo' isn't on my word search list."

In this part . . .

I introduce you to the wonderful world of word search puzzles! I explain some of the history of word searches and reveal handy techniques for solving these puzzles, as well as give you the tools of the trade. I also show you how solving puzzles can benefit your brain without feeling like homework.

I explain in detail how to solve each of the varieties of puzzles found in this book so that you're ready for whatever lies ahead. With this knowledge, you can become Mr. or Ms. Word Search Expert — no name change required.

Chapter 1

Hunting through the World of Word Searches

In This Chapter

- Discovering everything you need to know about word searches
- Considering the benefits of solving puzzles
- Investigating the history of word searches

Whether you call them Word Searches, Word Finds, Word Seeks, Word Sleuths, Find-a-Words, Wonderwords, Mystery Words, Seek-a-Words, Seek and Finds, or even Sopa de letras, these puzzles are hugely popular worldwide. They may even be more popular than crosswords, which is saying something!

In this chapter, I tell you a little about each type of word search puzzle in the book. I also delve into some of the benefits of word searches and round off the chapter with a fun history of these popular puzzles.

Word Searches at a Glance

Word searches in their simplest form provide a list of words that have been placed in a grid of seemingly random letters. Your task is to discover the words within the grid. The words can show up in any direction but always run in a straight line. Well, almost always.

In this book, I've written eight different types of word search puzzles, plus a bunch of bonus anagram puzzles. You may have come across some of these puzzle flavors before, but some may be new to you. (Chapter 2 gives you tips for solving word searches in general, and anagram-style puzzles. And Parts II and III have an entire chapter devoted to each puzzle type.)

The puzzle varieties are

- **Simple Word Searches:** These puzzles are the popular plain-vanilla variety — they have a list of words that are hidden in a grid of letters in straight horizontal, vertical, and diagonal lines. Head to Chapter 3 to try your hand at these puzzles!
- **Story Word Searches:** Read a short story and search for the bold words from the article in the grid. Otherwise, these searches are the same as Simple Word Searches. Chapter 4 contains the Story Word Searches.
- **Hidden Words:** Find all the listed words in the grid, and the leftover grid letters spell out a hidden message. Be careful to find all the extra letters to get the right answer! Some of these puzzles are in different shapes, a nice break from squares. Check out Chapter 5 for a plethora of Hidden Words puzzles.
- **Secret Shapes:** These word search puzzles have gridlines on them; after you find all the words from the word list, color in the leftover squares to reveal a picture. You can also color in the words, and leave the leftover letters blank — either method works. Chapter 6 lets you take a shot at some Secret Shapes.
- **Scrambled Words:** This puzzle may look like a Simple Word Search at first, until you realize that the word list makes no sense! The letters of each word are muddled up, so you need to unscramble each entry and then look for it in the grid. You can find these puzzles in Chapter 7.
- **Quiz Word Searches:** These puzzles are the closest thing you can get to a crossword in the world of word searches. Solve each quiz question and then find your answers in the grid. You can also work backward by finding potential words in the grid and then matching them to the word list. Chapter 8 features these searches.
- **Secret List Word Searches:** These puzzles are quite a challenge — you need to discover the words in the grid without a list to guide you. I do give you the theme, the number of words to find, and hints for most of the words. Try these puzzles in Chapter 9.
- **Winder Words:** In these puzzles, the words don't go in straight lines but rather turn on right angles. Words don't wrap around onto themselves, but different words do overlap. Winder Words appear in Chapter 10.
- **Anagrams and other word games:** This category includes anagrams, jumbled words, and other puzzles that require you to shuffle letters around to form words. Chapter 11 gives you some of these puzzles.

This list may seem like a lot of puzzles, but brains equally as warped as mine have created even more word search variations. And given how inventive humans are, I'm sure new variations on word search puzzles will appear in the future!

Using Word Searches to Keep Your Mind Sharp

In Chapter 15, I discuss the many good reasons to get hooked on word searches. Here's a quick rundown of some of the top reasons:

- They improve your vocabulary and spelling.
- They're very portable — you need only a pen or pencil.
- They're fun! (And who doesn't need more of that in life?)
- They're easy enough for children, so they're a great activity for families to do together.

Those benefits are pretty easy to understand. Less clear-cut is the link between doing puzzles like word searches and benefitting your long-term brain health.

Understanding dementia

The benefit of mental exercise (including solving puzzles) for your long-term mental health has been the subject of a great deal of research — and a lot of talk in the media — over the past 20 years or so. Does solving a puzzle a day keep dementia at bay? The short answer? *Maybe*.

And now for the long answer. *Dementia* is a blanket term for more than 100 conditions, all of which involve a gradual deterioration in thinking, memory, and everyday abilities. Science doesn't completely understand the causes of dementia — at least not yet!

The experts are still studying how dementia develops and progresses, and whether humans can do anything to delay or even prevent it. The scientific results aren't straightforward — human biology rarely is — and the results are varied.

In general, as we humans age, our brains shrink, and our mental abilities get worse (though this doesn't necessarily lead to dementia). However, recent research shows that you can prevent and maybe even reverse this decline by being physically active and giving yourself mental challenges.

In some studies, people improved their abilities in whatever aspect of mental training they were working on — so someone who was practicing memory skills, for example, showed improvements in memory, but not much improvement in speed of processing or reasoning.

Physical changes happen within your brain when you learn something new. Recent research has revealed that this flexibility or plasticity exists for your entire life span. It's your brain's lifelong ability to rearrange neural pathways based on new experiences.

Other recent findings show that humans have lifetime memory — so if you once played guitar or spoke French in your youth, picking those activities back up can reactivate those circuits in your brain, and you can regain those abilities relatively quickly. You won't end up learning from scratch.

Boosting your brain health

The following activities have been shown to benefit your brain's health:

- **Exercising:** Gardening, walking, cycling, dancing, swimming — whatever you enjoy. One study shows that 15 minutes of aerobic exercise three times a week cuts the risk of dementia by at least a third. Even stretching helps.
- **Training your brain:** The particular aspect you train improves that aspect of mental functioning, so solving logic puzzles like Sudoku helps your logical thinking, for example. To improve your memory, play memory games.
- **Studying a new language:** Try learning how to count to ten in a couple of languages if a whole language is too daunting.
- **Taking up a new hobby:** Knitting, embroidery, archery, camping — anything will do. And if it involves physical exercise benefits, even better!
- **Learning to use your computer:** Lots of courses are available (as well as younger people who know far too much about such contraptions for their own good).
- **Cultivating an interest in art and music:** Visit galleries, pick up a paintbrush, take a class or two, or listen to music. Play an instrument or sing if you can. If you can't carry a tune, try going to concerts or the theater.
- **Playing card and board games with your friends and family:** These pastimes are a great social activity as well as a good mental activity! Chess is rated as one of the top brain workouts around.
- **Solving puzzles:** This book is a good start, but don't stop here! You can do crosswords, cryptic crosswords, Sudoku (check out the *Sudoku For Dummies* series, published by Wiley), mazes, logic puzzles, and lots more.
- **Reading:** Widen your horizons, try new authors, and challenge yourself. Delve into the fun world of a book club at your local library or check out BookCrossing (`www.bookcrossing.com`) — both free and fun activities.
- **Doing jigsaw puzzles:** They help with visual and hand-eye coordination.
- **Socializing with your family and friends:** This activity is more important than you may think. And it doesn't have to involve the aforementioned board games — just hang out and chat.

Factors such as low education level, a family history of dementia, increasing age, head trauma, poorly controlled diabetes, stroke, smoking, and high blood pressure all increase your risk of developing dementia.

Sometimes, a person still develops dementia despite his best efforts. It's not his fault. The cause and effect is never that straightforward.

Even though you may not be able to avoid dementia or Alzheimer's entirely, you can probably stave off the onset and hopefully reduce the severity of the disease by being mentally active.

Research into dementia will continue, with new theories, studies, and discoveries hopefully leading to new treatments. While scientists work away on the mysteries of the brain, you can work away on the mysteries in this book and discover some benefits for yourself!

Considering the importance of mind puzzles and games

What you're looking for here is getting out of that rut. Doing something the way you've always done it seems to weaken the brain's wiring. Changes to your routines at work, school, and home always help, no matter what age you are.

Switching things up doesn't need to be terribly hard — even changing the way you normally drive to work helps your neural pathways grow and strengthen.

The four qualities to look for in the brain-friendly activities of your choice are

- **Novelty:** New is better! If you've only worked traditional word searches, try your hand at the nontraditional types. (See the earlier section "Word Searches at a Glance" for more info.)
- **Stimulation:** Activities that challenge you force you to concentrate. Look for word searches that use words you're unfamiliar with, involve solving extra puzzles like scrambled words or quizzes, or have odd shapes or challenging directions.
- **Escalation:** Activities that become increasingly difficult allow you to work up to higher levels of achievement. As you master a particular difficulty level for the word searches in this book, move up to the next level.
- **Reward:** Rewards improve learning and memory at a biochemical level. The sense of satisfaction you get from solving a difficult word search puzzle or discovering a hidden message is just one of the rewards you have to look forward to.

A Fun Romp through Word Search History

There isn't a lot of information available on the history of word search puzzles. Here's what I've been able to piece together; don't say I never gave you anything.

Around 1860, puzzle books of the day started to publish a new puzzle. A phrase, short poem, or other piece of writing (generally something frightfully educational and moralistic) was written along a path that was folded up to make a grid of letters, a bit like a maze. The paths were generally very regular, and each word came after the other in sequence. Diagonal movement was a no-no in these puzzles, and the letters didn't overlap.

You can try one of these puzzles for yourself in Figure 1-1. I wrote this puzzle in an old-fashioned style; you can find other puzzles like it in the book *Everybody's Illustrated Book of Puzzles,* by Don Lemon (Kessinger Publishing), originally published in 1890 in London. Start at the middle, with the big letter *A* and work your way out from there. You can find a hint in Chapter 12, and the answer is in Chapter 13 if you get stuck!

Proverbs within a Maze

E	R	T	H	A	N	T	H	E	B	E	S	T
T	T	H	E	Y	O	U	N	G	A	N	D	M
T	E	H	E	W	H	O	K	N	O	W	T	E
E	S	G	A	D	T	O	A	F	R	S	H	M
B	I	N	O	K	E	T	H	A	I	N	E	O
S	A	O	R	A	D	B	E	G	E	O	Y	R
I	R	L	E	M	R	**A**	G	O	N	T	W	Y
K	P	R	H	G	A	H	I	O	D	H	I	S
N	G	E	T	N	I	N	N	D	S	I	L	M
I	N	V	G	N	I	D	N	E	H	N	L	E
T	I	E	N	S	I	E	S	U	O	G	B	R
S	H	T	O	N	S	T	B	U	O	D	L	G
E	L	A	P	E	H	T	M	O	S	S	O	F

This is a kind of maze. Find the first letter of the first word, and then follow on till you have solved the secret. You may read from one letter to the next, north, south, east or west, but never in a diagonal direction. You will find here a small collection of proverbs which, if you heed, will be as useful to you as they have been to many others before you.

Figure 1-1: A puzzle in the early style of word searches.

Another early version of the word search was known as Word Chess, Knight's Tour Letter Puzzles, or Knight's Tour Crypts. The letters of the phrase or sentence in this sort of puzzle run along the path a knight in chess takes (two squares forward, one to the left or right; or one forward, two to the left or right). Very convoluted! You can still find these puzzles around in puzzle aficionados' magazines and Web sites.

Pinning down the first contemporary word search puzzle (with a set of words randomly placed in a grid of letters) is very difficult. Several people in several countries seem to have invented it independently around the same time.

The prolific Spanish puzzle writer Pedro Ocón de Oro, who designed around 125 different types of puzzles, invented *Sopa de letras* ("Soup of Letters"), probably sometime in the 1960s. This creation was a true word search puzzle with a word list and letter grid.

Norman E. Gibat from Norman, Oklahoma, seems to have been the first person to design a word search in English. He came up with the puzzle as a way of attracting readers to his small advertising publication, the *Selenby Digest* ("Sell and Buy," get it?). He put the names of 34 Oklahoman cities and towns in a 20 x 20 grid. He placed the words vertically, horizontally, and diagonally like they typically appear today, and his puzzle contained overlapping letters. It was published on March 1, 1968.

This new puzzle quickly became the most interesting item in the *Digest* (ads versus a puzzle — no contest!), and Gibat's readers clamored for more. The town's teachers quickly discovered these newfangled word searches and gave them to their students, establishing a long classroom tradition.

Two years later, French-Canadian Jo Ouellet developed the Wonderword puzzle, a themed word search whose leftover letters reveal a hidden word (see Chapter 5 for puzzles like this one). Her son David Ouellet has been writing these puzzles professionally for many years.

The word search's popularity has spread ever since: Word searches in a wide range of languages appear in ever-increasing varieties in classrooms, puzzle books, magazines, newspapers, and online under many different names.

Word search puzzles seem to be widespread in the Latin/Roman languages but are not common in Asian languages. The Spanish still solve Sopa de letras, the Swedish play Sökord, Germans unravel Wörterraten, the French solve Mots Caches, the Dutch enjoy Woordzoeker, Afrikaaners play Woordsoek-raaisels, and in Finland they have Sanaverkko, just to name a few.

One thing is for certain — if you love these puzzles, you're in good company!

Chapter 2

Perfecting Your Puzzle-Solving Strategies

In This Chapter

- Getting ready to solve word searches
- Discovering strategies that can help you with other word games

If you open almost any newspaper or magazine, you're sure to find a word search puzzle or two of some kind. They're popular puzzles for kids and adults alike, plus they're a good way to extend your vocabulary. Perfect for those times when you want to solve a puzzle without the mental stress of crossword clues or putting numbers in boxes!

In this chapter, I show you the various strategies for solving word search puzzles. I also include some hints and tips on how to work with random assortments of letters to make words — the sort of skills you need when you play games like Scrabble, Boggle, Upwords, and other anagram-type games.

Solving Word Searches

A *word search puzzle* is simply a collection of words hidden in a grid of seemingly random letters. A list of words to find appears next to the letter grid; in the puzzle, the words (almost) always run in a straight line horizontally, vertically, or diagonally in two directions; they read forward or backward in each of these four directions. This all adds up to eight different directions that words can be found.

Word searches range from small grids with easy-to-find words to large grids with challenging words — unusual spellings, short words — or even extra words in the word list that don't appear in the puzzle! Some puzzles have additional layers, like hidden messages; others are more difficult because the puzzle writer gives you no word list, scrambles up the words, or is otherwise fiendish, making you work that much harder!

Word search puzzles come in a seemingly endless number of varieties; although the basic solving strategies in this section are usually the same for each kind of puzzle, each type can also present its own challenges. Check out the chapters in Parts II and III for any additional instructions that apply to a specific type of puzzle.

Every single puzzle in this book has a hint; if you get really stuck, don't give up and head to the answers right away — give the hints section a try (see Chapter 12). This section is my chance to whisper over your shoulder and encourage you to keep going! Nothing beats the satisfaction of solving a difficult puzzle all by yourself (or with a little help), and I know you can do it.

Gathering your equipment

All you need to do a word search is a way of marking the words you've found in the grid. Because some words overlap and letters may be used more than once, the main goal here is to use a writing instrument that doesn't obscure the letters.

Though a crayon may be the handiest tool if you live with young children, the simplest choice is a pencil or pen. A pencil and eraser are advisable if you're dealing with a more difficult puzzle.

My favorite tool when solving word searches is a highlighter pen. Highlighters help you easily see where each word is, and they don't obscure the letters. I think yellow is the easiest color to see through, but you can find plenty of other colors — use whatever tickles your fancy!

Finally, a dictionary, other reference books, or even some Web sites may be helpful with some harder puzzles.

Marking the words

After you pick a marking tool, you have to figure out how you're going to mark the words themselves after you've found them. Keep in mind that some letters in the grid are used in two or three words, so you don't want to completely obscure them when you're marking words in the grid. This section gives you some options.

The highlighter pen works well with overlapping letters because you can see the underlying letters clearly. When a few letters overlap, the ink is a bit darker in that section. This method also makes finding leftover letters easier. See Figure 2-1 for an example.

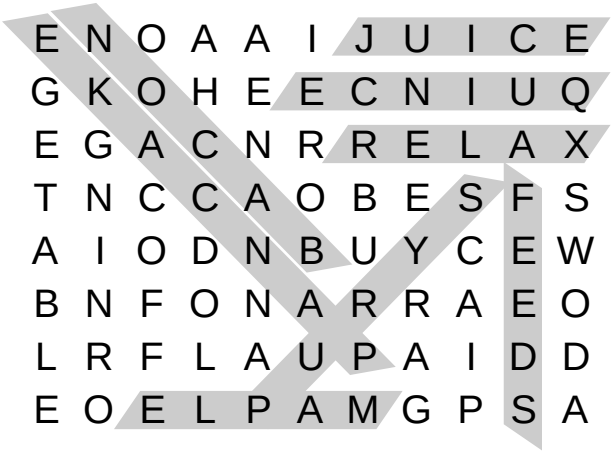

Figure 2-1: A highlighter pen makes marking words in the puzzle very easy.

If the paper your puzzle is printed on is thin, the highlighter may bleed through to the other side. Test the pen on the margin first so you don't accidentally mess up another puzzle's grid.

If you prefer to use a pen or pencil, simply draw a loop around each word as you find it. ***Remember:*** This way of marking the words can sometimes make locating leftover letters a bit confusing, so be sure to look extra carefully! You can also circle the letters of the words you find one-by-one. This method makes it easier to see hidden word messages because the leftover letters stand out better. I demonstrate both methods in Figure 2-2.

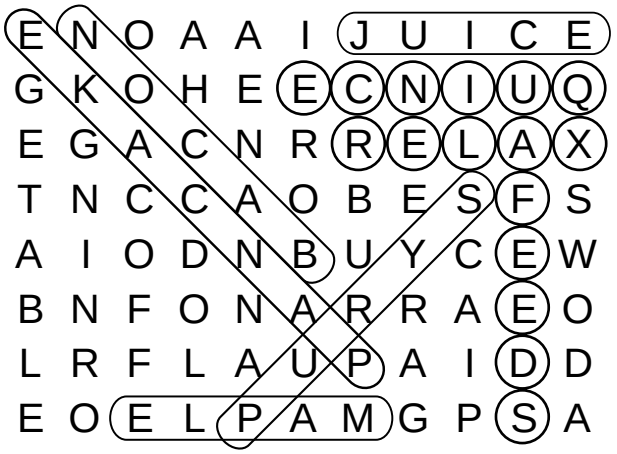

Figure 2-2: The classic loop and individual letter methods.

You may also like to simply draw a light line through the words in pencil or colored pencil. This method can work well, as long as you can still see the letters. Because of overlapping words, you may need those letters in another word before the puzzle is done.

Tackling the grid

Let's face it, word searches are, well, fairly simple puzzles, and there's not a huge amount of strategy involved in solving them. However, there are some tricks of the trade:

- **Scan the grid lines either up and down columns (see Figure 2-3), or backward and forward across rows, line by line (see Figure 2-4).** Going through a grid both ways generally helps you catch anything you missed on the first pass. You may find that running a finger or the end of your pen (not the ink end!) along the line helps you keep your place.
- **If you're feeling very focused, you can try the *speed search* method and scan up and down two columns of letters at a time.** (Figure 2-3 also shows you an example of this method.) Use your finger to help you keep place. I find this method works best when scanning the grid vertically and not along rows, but if it works for you, go for it.

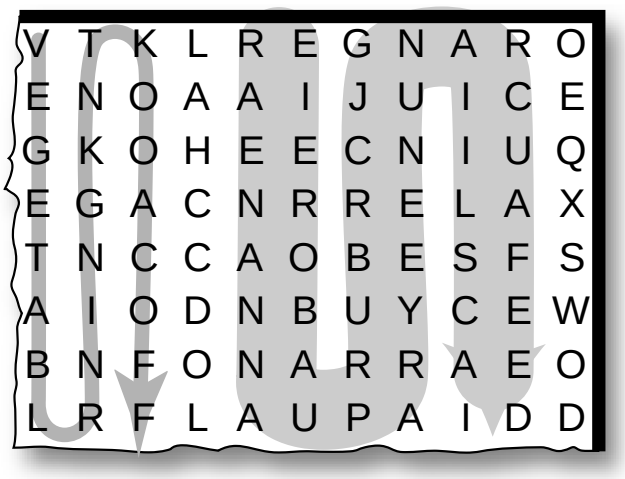

Figure 2-3: Scanning a word search grid column by column and using the speed search method.

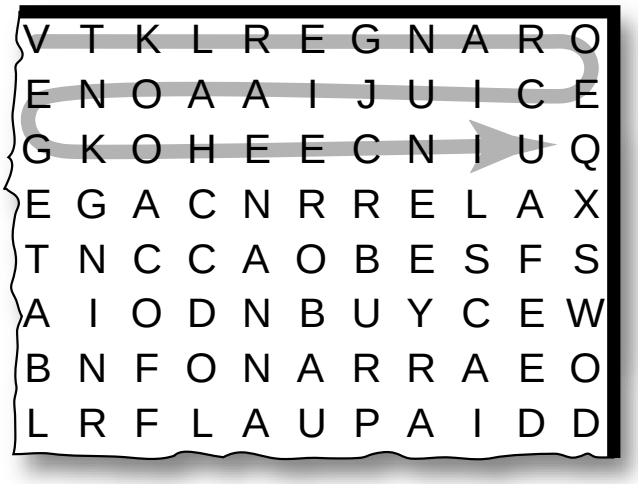

Figure 2-4: Scanning a word search grid row by row.

- **Look for the first letter of the word you're searching for.** When you find it, run your finger around the letter in a *circle check,* looking at each of the letter's eight neighbors.

  In Figure 2-5, for example, you're looking for the word PANCAKE. Search along the rows or down the columns for the letter *P.* When you find a *P,* stop for a second and look at the eight letters around it for the second letter *(A).* If you find an *A,* look in that *same direction* for an *N* (because the word must be in a straight line) and continue until you find the whole word. You can see here that three *A*s appear next to this *P,* but only one then follows on to an *N* and then the rest of the word PANCAKE.

- **Simply stare at the grid until words pop out at you.** This method may sound ridiculous, but it can be surprisingly effective, especially for longer words and those that run forward. This method can get you *some* of the words but probably won't reveal all of them.

- **Look for rarer letters that occur within a word.** The letters *Z, Q, J, X, K, V, B,* and *W* are (in descending order) the least frequently used letters in the English language, so they probably appear less often in the letter grid. If the word you're searching for is SOJOURN, you may find it more quickly by looking for the *J* rather than starting at the *S.*

  However, if the puzzle writer is being particularly devious (why are you looking at me like that?), she may counterbalance this rare letter effect by using plenty of these letters in the *grid fill* — the letters that are added to complete the grid after the words have been placed.

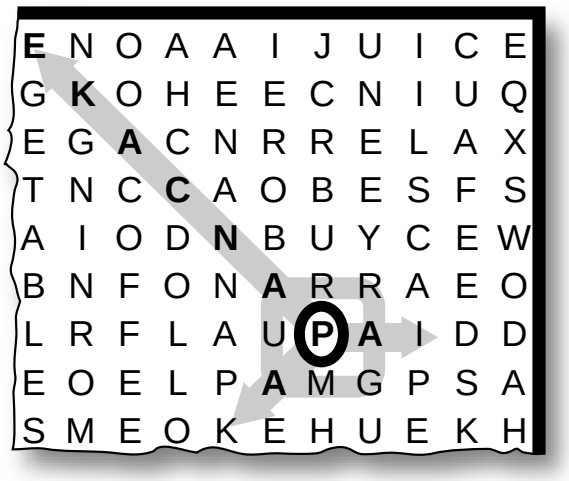

Figure 2-5: The circle check is the most common method for finding words in word searches.

- **Watch for certain letters that may pop out at you more than others, especially circular letters.** You may find that *O, Q, C,* and *X* are easier to see in the grid.
- **Look for other patterns in the words, especially double letters.** Scan your word list for words with double letters — *LL, EE, SS, OO,* and *TT* are the most common ones — and then search for these in the grid.
- **Focus on the *shapes* letters make instead of thinking of them as letters, and look for the visual patterns.** This strategy kicks the creative, pattern-recognizing right side of your brain into gear and forces that bossy, logical left side to take a back seat.

Moving Past Word Searches: Anagrams and Other Word Games

You may be struggling to find a word — *any* word, let alone a high scoring one — in Scrabble or Upwords. Or your partner may keep beating you at Boggle (in our house, the kids wrote "No Daddy!" on the box). Perhaps WordScraper on Facebook or the Jumble puzzle in the paper is driving you nuts. Maybe you keep coming to a sticky end in Hangman.

Never fear — help is at hand. In the following sections, I give you a crash course in anagrams, including some of their history and a whole bunch of patterns and strategies that can help you improve your game skills and blitz the opposition!

Understanding anagrams

An *anagram* is one or more words created from the letters of another word. One example is GARDEN and DANGER — they have the same set of six letters rearranged to make different words.

Anagrams have been around for thousands of years. The Ancient Greeks were particularly fond of a good anagram, and in the Middle Ages an anagram of a person's name was thought to reveal her true nature and future. Some authors have written under anagrams of their real names.

Anagramming as a party game and puzzling pastime reached the height of its popularity in the Victorian era; Lewis Carroll especially championed the form. Anagrams that create particularly clever or appropriate messages are highly prized. Did you know LIONESSES are NOISELESS? And MARRIAGE can be A GRIM ERA. Perhaps that last one is an *antigram* — an anagram that results in a phrase opposed to the meaning of the starting words, like turning ASTRONOMERS into NO MORE STARS.

You may be familiar with anagrams in cryptic crosswords, Jumble puzzles, Scrabble, Boggle, and some TV game shows. Some computer puzzle adventure games have anagram puzzles to solve. Plenty of word fans enjoy creating clever anagrams, and you can find these folks and their wordplay online if you get hooked!

The excellent program *Zyzzyva* is perfect if you want to play around with anagrams and other word games. It's helpful for solving all the puzzles in Chapter 11, as well as the Scrambled Word Searches in Chapter 7. You can download it for free at `www.zyzzyva.net`.

These puzzles are a bit different from the others in the book, and all have one thing in common — you need to discover words within a random set of letters. You know these games all too well, I'm sure!

Anagramming tricks

The classic game of Anagrams is a fun pen and paper game — simply start with a word or sentence and, using *just those letters* (no repeats allowed), turn them into another set of words.

You can reach the heights of this game by creating related (and generally funny or apt) names or phrases. For example, the letters of THE MONA LISA also cleverly spell out NO HAT, A SMILE.

When you're faced with an unruly collection of letters — whether in a straight anagram, a cryptic crossword clue, or a set of tiles in a game — some of the following tricks should help you tame them:

- **Write the anagram backward or in a circle.** Basically, mix up the letters *more*. This tactic is especially helpful if you're starting with a word that you need to turn into another word (such as going from EGRET to GREET).
- **Divide the letters into vowels and consonants.** This technique works well for long anagrams.
- **Write the scrambled letters out in alphabetical order.**
- **Look for common patterns that you can make with the set of letters you've got.** *SH, CH, TH, HE, AN, RE, IE, LL,* and *EE* can get you started; see Chapter 14 for a full collection.
- **Expand your vocabulary so you know more words.** Even learning just one new word a day makes a difference. You can subscribe to free online services at
  - **A.Word.A.Day:** `wordsmith.org/awad`
  - **Dictionary.com:** `dictionary.reference.com`
  - **Merriam-Webster:** `www.merriam-webster.com/cgi-bin/mwwod.pl`
  - **Oxford Dictionaries:** `www.askoxford.com`

See what you can find with the letters of your own name, using the tips in this section. For instance, my name (DENISE SUTHERLAND) can spell out DEADLINE, SHUN REST, which seems incredibly appropriate at the moment! To try your hand at some created puzzles, head to Chapter 11.

Rearranging letters for tile games

Some word games, such as Scrabble and Upwords, depend on rearranging letters to form words. In these games, you have no guarantee that the set of letters in any given hand can form a good collection of words — you may be struggling with only one vowel (or nothing but vowels). The following list gives you some helpful hints for working with what you've got:

- Keep shuffling your letter tiles to see what patterns fall out.
- Take into account the available letters on the board.
- Look for common letter combinations such as *TH, HE, AN, RE, SH, ON, ST,* and *TR* (see Chapter 14 for a full list).
- Suffixes such as *ER, ED, ING,* and *IER* are helpful. So are prefixes such as *DE, UN, PRE,* and *IN.*

- Some letters are more likely to occur at the start or end of a word. For example, *B* and *W* are more likely to appear at the beginning of a word than the end, and *Y* and *E* are more commonly end letters than starting letters.
- Oh, did I mention? Keep moving those tiles!

Note: This book isn't a guide on how to become a champion Scrabble player or even get high scores. For that sort of training, I suggest you look for one of the many excellent books on the market or search the Internet — you can join a host of good Web sites and groups. *The Official Scrabble Players Dictionary* (Merriam-Webster) and Joe Edley and John D. Williams Jr.'s book *Everything Scrabble* (Pocket) provide expert knowledge.

Baffling letter squares

What about games like Boggle that come with the instruction to "make as many words as you can using these letters"? These games often have arbitrary rules to make things harder, like outlawing two- or three-letter words or requiring every word to use the central letter in the grid. And if you're playing it on the Internet, no doubt you have a time limit too. Infuriating!

Whether you're playing Boggle or a similar version of the game that's popular in newspapers, the following tips can help you get the most out of those few letters:

- **Get the rules clear in your mind.** Are you allowed to move diagonally? What is the minimum word length? Does the central letter have to be included in every word? Are proper nouns allowed?
- **Focus on a quarter of the grid at a time.** Look at each of the letters in turn and do a circle check (as much as possible, even if it's just a half circle). Follow up any good combinations to see whether they lead to words.
- **Move on to the next quarter and repeat until you've surveyed the whole board.** This systematic rotation helps you ensure that you're not missing anything.

You may prefer to get a good general look at the grid of letters and work by feel rather than in the methodical way described in the preceding list. This more informal approach can be a better way of finding long words in the grid. Here are a few pointers:

- When you find a word, look for plurals and variations (PLAY, PLAYS, PLAYED).
- Look for vowels and search around them to make words. Do the same with the most common consonants *(T, N, R, S,* and *H).*

- Look for longer words around a shorter word (CAT can expand to LOCATE) and short words within a longer word (DEPEND breaks down into PEND, PEN, and END).
- Look for rhymes (SIT, BIT, FIT, HIT, KIT, KNIT, and so on).
- Look for suffixes like *ED, ER, IER, ING,* and *TION* and prefixes like *RE, DE, UN, IN,* and *AN.*
- Look for two-letter patterns (such as *ST, SH, STR, SP, TR, TH, PR,* and *DR*) at the beginning of words.
- Look around an *E* for Vowel–Consonant–Silent E patterns like *ATE, ORE,* and *ISE/IZE.*
- Know the most common letter patterns; you can find a list in Chapter 14.
- Widen your vocabulary (see the "Anagramming tricks" section earlier in the chapter for a list of word-of-the-day e-mail services).

Staying alive in Hangman

My main advice for Hangman is to know the list of the most frequently used letters (*E, T, A, O, N, R, I, S, H,* and *D,* in descending order) and the common English-word letter patterns — the ones in Chapter 14 (you knew I was going to say that, didn't you?).

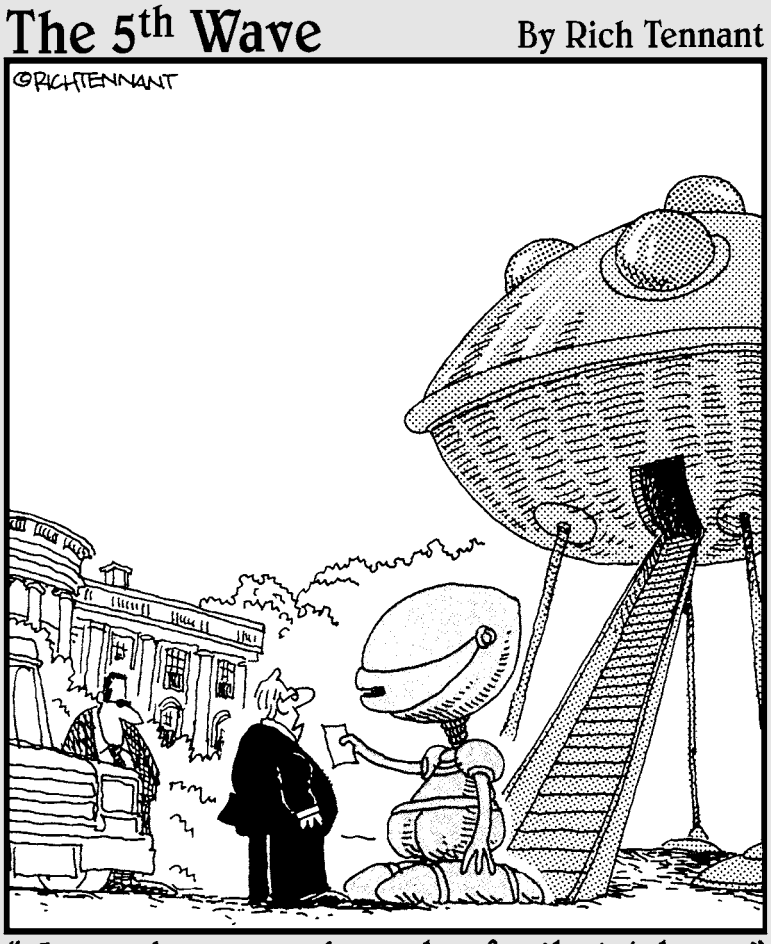
For almost all words (3 to 15 letters long), your best first guess is either *E* or *I* (better minds than mine have done all the tricky computing to figure this out; check out `www.sharkfeeder.com/hangman` if you're interested in the details). If it's a two-letter word, guess *A*.

Of course, you can use this information *against* your opponent — select shorter words that *don't* use the top ten letters. The least frequently used letters in English are *G, Y, P, W, B, V, K, X, J, Q,* and *Z* (the least-used of all).

Hangman is yet another game where a wide vocabulary makes all the difference. Confront your opponent with FOX, JIVE, or EPOXY, and you'll soon be the undisputed Hangman Supremo!

Part II

Starting with Straightforward Puzzles



In this part . . .

This is what you've been waiting for — the puzzles! This part has the straightforward puzzles: the Simple and Story Word Searches, the Hidden Words, and the Secret Shapes. Each puzzle chapter contains Easy, Medium, and Hard puzzles. Work through each chapter in order to build your skill set and face the challenge of increasingly difficult puzzles. Or jump around within this part to try different puzzle varieties, difficulty levels, or themes to suit your mood.

Chapter 3

Trying Your Hand at Simple Word Searches

These puzzles are the plain-vanilla word searches. The words are scattered through the letter grid, running in straight lines in any of the eight directions. After you find them all, you're done!

Some harder puzzles of this type have extra words in the word lists that don't appear in the grids. Your challenge is to not only find all the words in the grid but also identify the words that *aren't* there. I tell you how many words are extra so you know when to stop looking.

If you get stuck at any point, head to Chapter 12 for a hint — I include a hint there for every puzzle in this chapter. After you complete each puzzle, you can check your answers against the answers in Chapter 13.

Chapter 4

Reading up on Story Word Searches

In this sort of puzzle, the words are still scattered through the letter grid as in a Simple Word Searches (see Chapter 3), but you have to extract the word list from a short, and hopefully interesting, story or article. The words you need to find are in bold.

Consider the following list of tips to help you with the puzzles in this chapter:

- When two bold words occur one after the other, look for them as a single entry in the puzzle.
- If you prefer to work from a list, you can write out the bold words on a scrap of paper first. Otherwise, simply find the words in the order they appear in the story.
- It can help to keep track of which words you've found — and which ones remain to be discovered — by crossing them off in the story.

Puzzle 28: Old Gold

Difficulty Level: Easy

Ah, **chocolate** — one of the major food groups . . . where would humanity be without it? Whether you love white, milk, **dark**, or **bittersweet** chocolate, you're sure to find the perfect **delicious** treat. And if you buy Fair Trade, your money buys more than just chocolate!

Ancient **Mesoamericans** first discovered the **cocoa** tree in the Amazon **rainforest** thousands of years ago and used the bitter water they made from its seeds in ceremonies. Spanish **conquistadors** brought the **cacao** seeds back to Spain, assuring chocolate's **reign** over the world.

Initially chocolate had to be prepared by hand — a lengthy and difficult process. The resulting oily, **gritty** paste was used to make an **expensive** beverage for **royalty** and the wealthy.

The Industrial Revolution changed all that. **Doret** and Dubuisson in France and **Van Houten** in the Netherlands invented machines that made **grinding** and pressing the cacao seeds into paste and cocoa powder amazingly fast. The paste was also beautifully smooth and **creamy** and could be formed into chocolate bars.

Daniel **Peter** and Henri **Nestlé** worked together to add condensed milk to chocolate, creating milk chocolate. Rodolphe **Lindt** developed a blending technique called **conching**, which created an even smoother texture and taste.

Finally, chocolate was within the reach of **everyone,** and it became wildly popular. The mass-production of sweets, candy bars, and chocolate bars hasn't let up. **Hershey**, Mars, **Cadbury**, Nestlé, and Lindt have been around since the Industrial Revolution and are still the biggest producers today.

Most of the world's cocoa is now grown in West Africa, especially in **Côte d'Ivoire**. It's a **labor-intensive** crop — workers tend, harvest, dry, and pack the plants and seeds **by hand**.

Cacao **farmers** often receive very little **profit** from their **crops**. Some try to stay afloat by using child labor or even returning to the bad old days of **slavery**. **Fair Trade** cocoa is a system that offers farmers a better way of making a living, helps break the poverty cycle, and stops abusive practices.

Puzzle 29: Little Mary

Difficulty Level: Easy

Gladys Louise Smith was the first international **film** star. You may know her better as Mary Pickford or "America's **Sweetheart**." The **Canadian** was born in 1892 and started acting at a young age. In 1907, Gladys was signed to appear on Broadway with New York producer David Belsaco. He insisted that she change her name, so **Mary Pickford** was born.

In 1910, Mary made the move to the **silent** silver screen. She auditioned for filmmaker D.W. **Griffith** of **Biograph** Studio, and was hired immediately. Over the years Pickford worked with Carl Laemmle's IMP company and Adolph **Zukor's** Famous Players Film Company. She was one of the four founders of the **United Artists** movie studio in 1919, along with Douglas **Fairbanks**, Charlie **Chaplin**, and D. W. Griffith. Eventually Mary was involved with many levels of the movie making process, including writing, **directing**, and producing.

By age 24, Mary Pickford was the most **famous** and popular woman in the world because of the spread of American movies internationally. It was easy to adapt silent movies for the **worldwide** market — they just had to change the language on the **subtitles** that provided text for the movie!

Mary played appealing, sympathetic characters, and her **outgoing** and sincere performances struck a chord with audiences worldwide. She almost always played **children** or young adults, even when she was in her 20s. Mary and her writer friend Frances Marion invented cinematographic devices — such as tricks of **perspective**, oversized **props** and sets, and casting tall actors — to sustain the **illusion**.

In 1927 Mary released her last silent film, ***My Best Girl***. In 1928, Mary cut off her famous long **blond** curls, and took on serious dramatic roles. Her first talkie movie was ***Coquette***, which won her the Best Actress Oscar in 1929. *The Taming of the Shrew* was also released that year. Mary completed three more films after this — *Forever Yours (1930), Kiki (1931),* and *Secrets* (1933) — but none was a success. She **retired** from acting when she was 41, but remained involved in **Hollywood** for many years.

Mary Pickford was an incredibly influential actress — she instituted many **standards** for actors in the fledgling movie industry, established and ran a major film production company, and starred in over 50 feature-length films, including *The Poor Little Rich Girl,* ***Pollyanna***, *Little Lord Fauntleroy*, *Rebecca of Sunnybrook Farm*, ***M'Liss***, *Sparrows,* and *Little Annie Rooney.*

Puzzle 30: It's Easy Being Green

Difficulty Level: Easy

If you're anything like me, you may be frightened by the impact **climate** change is having on the **world**. Because the problem is so huge, you may think you can't do anything to make a difference. But you can make plenty of **practical** and **simple** changes that won't break the bank and will make a difference. The collective action of thousands and even millions of people all making some **positive** changes *can* affect the whole planet.

The big picture clearly shows that using **renewable** energy sources is vital — hydroelectricity, solar power, tidal energy, **wind** power, and geothermal energy are some options here. In many places, you can **choose** the source of your domestic electricity. You can use many solar-powered devices around the home — garden lights, lanterns, and even small portable **solar** chargers for cellphones, MP3 players, and laptops.

Try a **low-carbon** diet, choosing foods that result in a smaller *carbon footprint* (environmental impact). Become a ***locavore****:* Get more of your food from the local farmers' **markets**, and eat **seasonal** produce. This change reduces the number of ***food miles*** (the distance food is transported from producer to consumer) produce has to travel to your door. Buy foods with less packaging and **processing**. Buy **Fair Trade** coffee, tea, chocolate, and so on where possible.

Try using **pencils** (the sort with graphite lead inside a wooden case) rather than disposable pens. The pencils are not only **biodegradable**, but they can also draw about 18 times further than a pen. A **fountain** pen with a refillable ink bladder is even better (and more stylish).

Save water by taking **shorter** showers, and don't let the tap run when you wash your hands or brush your teeth. Drink **tap water** rather than bottled water. You can filter it if you're concerned about water quality, but you help to keep billions of disposable bottles out of **landfill** by using a cup or your own water bottle. And bottled water can be more expensive than gasoline!

Join **Freecycle.org** or **BookCrossing**.com. Discover your local **library**. **Grow** some of your own food. **Walk**, ride a **bike**, or take the **bus** rather than the car. Use your own **coffee** mug if you can when you go to your local coffee shop. **Receive** and pay your bills electronically. Recycle **paper**. Buy secondhand clothes and fabrics made from organic cotton, hemp blends, and **bamboo**. Make the **change** to low-energy fluorescent light bulbs. Bottom line: You can do lots of things that will have an immediate **impact** — pick a couple and **start** today!

Puzzle 31: All Awash with Watercolors

Difficulty Level: Easy

If you get bitten by the **watercolor** bug (you'll know if you do — it's beautifully colored and entrancing), you'll **discover** a whole world of equipment as well as a lifetime of **learning** how water and color flow and **interact** on paper!

Watercolor paints are made from finely ground pigments mixed with **gum arabic**, glycerin, and a wetting agent. They come in various forms: **tubes**, **cakes** (also called *pans*), liquids, and pencils. Tube **paint** is easier to mix and good for large **washes**. Cake paints give you more immediate access and are great for portable painting and painting details.

Paints come in a wide range of colors with evocative names, such as Gamboge, Viridian, **Cerulean** Blue, Phthalo **Violet**, Cadmium Scarlet, Burnt Umber, Ultramarine Blue, Indigo, **Raw Sienna**, Cobalt Violet, Indian Red, and **Prussian Blue**. Different paints have different characteristics — such as being **transparent** or opaque and **staining** or non-staining — and different amounts of **sediment**.

Watercolor brushes come in a wide range of shapes, **fibers**, and styles. A **rigger** has long fibers and is great for producing thin lines. A **flat** brush has hairs in a flat rectangle and can range in width from quite narrow to several inches wide for painting flat washes. **Round** brushes are versatile, so you want to have them in a range of **sizes**. When choosing round brushes, make sure they come to a sharp **point** and hold a good amount of paint.

Kolinsky sable brushes are the very **best**. Oddly, their fibers come from the tails of Siberian martens, not sables! Other fibers choices include ox hair, badger hair, **camel** hair, goat hair, **Chinese hog bristle**, and a wide range of synthetics. Some brushes mix sable with synthetics to provide the benefits of a sable brush at a lower cost.

Watercolor **paper** comes in a range of surfaces. **Hot pressed** paper is fine-grained and smooth; **rough** paper has — you guessed it — a very rough surface and gives a lot of texture to a painting. Cold or not-pressed paper falls somewhere in the middle, with a slight texture to the surface. Look for **archival** quality paper (with a neutral pH and made from permanent fibers such as **cotton**), and your gorgeous artwork will **last** forever!

Puzzle 32: Il Menù Per Favore

Difficulty Level: Medium

Italian cuisine has been around since **antiquity** and is one of the most appetizing and best-known cuisines in the world. After all, what town doesn't have a pizzeria? But Italy has so much more to offer than just **pizza**, lasagne, and **spaghetti** Bolognese! Every region has its own specialties.

Italian cuisine is full of rich and delicious dishes — try risottos made with Arborio rice, **frittatas** made with eggs and vegetables, **polenta**, stews like **osso buco** and buridda, and **soups** like minestrone. Chewy Italian **bread** dipped in a fragrant extra-virgin olive oil is a wonderful meal in itself.

Olive oil is a basic ingredient in Italian food. Herbs and other seasonings common in Italian **cooking** include garlic, flat-leafed parsley, sweet balsamic vinegar, **capers**, **anchovies**, oregano, sage, thyme, **basil**, and tarragon. Sweets often use cinnamon, **almond**, or vanilla for flavor.

But no dessert until you finish your meal! **Antipasti** are the traditional way to start an Italian meal. A typical antipasti platter has a variety of smoked or cured meats, like **prosciutto** or pancetta, **marinated** vegetables, and cheeses. You're likely to find asparagus, eggplant (**aubergine**), sun-dried tomatoes, **porcini** mushrooms, **fennel**, bell peppers (capsicum), and artichokes. And don't forget the olives, both **green** and black!

Parmigiano-Reggiano cheese from northern Italy (also known as Parmesan) has been a stock ingredient in many kitchens for ages, as has soft, stretchy mozzarella. Other Italian cheeses are gaining in popularity too — semi-hard provolone, the soft sheep's milk **whey** cheese ricotta, soft **bocconcini** and **mascarpone**, the blue cheese **gorgonzola**, and caprino (made with **goat's** milk), to name but a few.

Pasta is another Italian food that can be found everywhere — it's the basis of so many quick, healthy meals. Macaroni, **penne**, spaghetti, **fettuccine**, **farfalle**, and vermicelli ("little worms") are just a few of the shapes available. Gnocchi are tender dumplings made from potato, flour, **semolina**, or a combination thereof.

Italian cuisine doesn't just taste good, either — many experts recommend a so-called **Mediterranean** diet high in olive oil, **legumes**, unrefined cereals, produce, **fish**, **wine**, and poultry as a **healthy** option. So what are you waiting for? ***Buon appetito!***

Puzzle 33: Birthstones and Flowers

Difficulty Level: Medium

The **tradition** of assigning certain gemstones and **flowers** to each month includes the idea that **wearing** your birthstone makes you **luckier**. Even if you don't believe that, birth flowers and birthstones are lovely **gifts**. Flowers also have symbolic meanings and are a thoughtful inclusion in a celebratory **bouquet** for a new baby or any birthday. Take a look at the flowers and gemstones for each month:

- January's birthstone is **garnet**, and the birth flower is the **carnation**, a fragrant winter flower with meanings of pride, love, and **beauty**.
- The birthstone for February is almost always **amethyst**, although pearl is an option too; the birth flowers are **iris** and violet, both beautiful heralds of spring.
- March's stone is **aquamarine**, and its birth flower is the **daffodil**, which symbolizes a return to warmth, rebirth, and **hope**.
- The stone for those born in April is the **diamond**; their flower is the **daisy**, a symbol of innocence, modesty, and brightness.
- May's birthstone is the **emerald**. **Lily of the valley** is the flower, representing **purity** and a return to happiness.
- June babies' birthstone is the **pearl**; their flower, symbolizing **love** and appreciation, is the **rose**.
- **Ruby** is the modern birthstone for July, but onyx was the classic stone. The flower is **larkspur**, bringing to mind **summer** meadows, lightness, and levity.
- The contemporary stone for August birthdays is **peridot,** but you also have a lot of choice from times past: topaz, carnelian, moonstone, alexandrite, sardonyx, and sapphire. **Gladiolus** is August's flower, symbolizing strength of character and remembrance.
- For September, the stone is **sapphire**. **Aster**, a classic autumn flower that represents patience and daintiness, is its flower.
- October's birthstone is **opal**; tourmaline, aquamarine, and beryl are other, old-fashioned choices. **Marigold**, following the sun, is October's flower.
- The stone for November is **topaz**. **Chrysanthemum** is the month's flower, symbolizing cheer and **joy**, compassion, and friendship.
- **Turquoise** is the birthstone for those born in December, although ruby and bloodstone were older choices. The fragrant **narcissus**, a symbol of peace, is December's flower.

Puzzle 34: Knitting with a Twist

Difficulty Level: Medium

Knitting has never really gone away, but it has been hiding for a while. Now it's back and reinvigorated by an **unexpected** source: the **Internet**!

The online knitting and crocheting community is huge. Women, **men**, kids, **teens**, older crafters, and everyone in between are getting back into the **simple joys** of making things **by hand** — with their computers by their sides.

One new technological invention is free online knitting and crocheting magazines. **Knitty.com** is foremost among these publications — a sassy, **funny**, intelligent Canadian quarterly production with **free** patterns, articles, and more. Knitty was established by **Amy R. Singer** in June 2002 and has well over 30,000 readers worldwide every day.

Thousands, if not millions, of stitchers have blogs (**web logs** or online diaries). They share photos of their **WIPs** (Works in Progress), **UFOs** (Unfinished Objects), and FOs (Finished Objects). Experienced crafters often put up free **patterns** or write tutorials on their blogs. Knitting authors such as Stephanie Pearl-McPhee (**The Yarn Harlot**) have risen to great prominence through blogging, in addition to their wonderful knitting **books**.

Some folks offer online *knitalongs,* in which they decide to knit a particular pattern, say, a **pair of socks** or a **lace** shawl, and **invite** others to knit it at the same time. **Knitalongs** often have their own blogs, where members share any difficulties they're having with the project, post **photos** of their progress, and generally join in and help each other despite being scattered across the globe!

Ravelry.com, set up by Casey and Jessica Forbes in May 2007, is another online outlet for fiber crafters. It's an online **community** where you can keep track of your **projects**, yarn **stash**, books and magazines, and inventory of needles and **hooks**, as well as find kindred crafting souls. Through Ravelry's pattern and yarn directory, you can see what other people have made with a particular yarn or how their version of a pattern turned out.

All this online networking also leads to more get-togethers **in person** and an increasing **circle** of friends. Most cities and towns have active knitting groups that meet regularly in **cafés**, pubs, libraries, and other public places. If you can't find one of those, join World Wide **Knit in Public** Day, the brainchild of Danielle Landes. It's the **largest** knitter-run public activity in the **world**, held each year on the second Saturday in June. So if you see knitters and crocheters around, don't be scared by the **pointy** sticks — come on over and join in!

Puzzle 35: You Say Tomato

Difficulty Level: Medium

When the Pilgrims left England for the New World in 1620, they took with them **Elizabethan** English. In each country the **languages** changed, to the point where, as George Bernard Shaw supposedly said, England and America are "two countries divided by a **common** language."

Many American words are pulled directly from Elizabethan English but have fallen from use in England. Included in this category are **gotten** (*got* in modern England), fall (***autumn***), mad *(angry),* platter *(large dish),* **deck** of cards (***pack*** *of cards),* and trash (***rubbish***), to name but a few.

Many words sneered at in Great Britain as "vulgar Americanisms" are in fact British in origin and not American at all; some of these are ***glee***, *jeopardy*, *smolder*, and ***progress*** as a verb. The British use a great deal of American words and spellings, even **replacing** some of their own words almost without being aware on it. This list includes, in part, **mask** for *masque*, truck for ***lorry***, jail rather than ***gaol***, eventuate, input, **commuter**, gimmick, **babysitter**, lengthy, hangover, blizzard, teenager, **soggy**, graveyard, raincoat, **notify**, and publicity.

Many American and British words are spelled differently. Commonwealth countries — **Canada**, Australia, and **New Zealand** in particular — also use U.K. spelling. In general, they use a *u* in many words, where Americans have dropped it. Color and ***colour***; humor and *humour*; honor and ***honour****;* and labor and *labour* are the most common examples of this. Other common letter substitutes are *z* instead of *s* (the U.S. finalize versus the U.K. *finalise*), *-er* instead of *-re* (theater versus *theatre*), and single instead of **double** letters (counselor versus *counsellor*).

American **spelling** is often simpler than its U.K. counterpart (which generally retains letters that reveal the original origins of a word, such as **French**); some examples include program instead of *programme*, catalog instead of ***catalogue***, dialog instead of ***dialogue***, and omelet instead of *omelette*. American aluminum is ***aluminium*** in England (and everywhere else in the world). Other differences include **gray** instead of *grey*, ax instead of *axe*, and inquire instead of *enquire*.

The languages also have many differences in **idiom**, which can trip up the unwary traveler. Just one example: a **biscuit** in America is a **scone** in the U.K., while a biscuit in the U.K. is a **cookie** in America. The main thing to remember is that while these **two** varieties of English *are* different in many ways, they have more in common than may at first be apparent, and neither one is **better** than the other!

Puzzle 36: Trick or Treat!

Difficulty Level: Medium

Halloween is one of the few **ancient** festivals that is getting *more* popular around the world. It's already well established, in some form or other, in the United Kingdom, Ireland, the United States, Canada, Mexico, Northern Italy, and **Romania**. In recent years it has become popular in Japan, **Germany**, Spain, and some South American countries; it hasn't **been** as widespread in Australia and New Zealand, but it's slowly becoming more accepted.

The conflicting theories about the **origins** of Halloween are difficult to verify after thousands of years. The first text records of Halloween are of the night before **All Saints' Day** in Scotland in the 700s. Though it was something of a sidenote to that holiday, eventually it became a **festival** in its own right. As time went on, **Scottish** children started to **dress** up and go door-to-door asking for money and sweet treats. Halloween eventually spread from Scotland to **England**, Wales, and Ireland in the 1800s. *Love **divinations*** **—** trying to discover who your future husband or wife would be with mirrors, apple peels, and roasted **nuts —** were a popular Halloween pastime in **Victorian** times**.**

Halloween nearly died out in the United Kingdom and **Ireland**, but it was **revived** in North America by Irish immigrants in the late 1800s. And boy, did it ever take off! Halloween is now **big** business, as well as a lot of **fun**. No wonder it's an increasingly popular festival: Dressing up in a **costume** and going **trick**-or-treating is a highlight of any **child's —** and many an adult's — year. After all, what other time of year can you dress up as a **ghost**, mummy, **witch**, skeleton, **demon**, superhero, **zombie**, elf, **alien**, angel, **fairy**, pirate, or anything else without attracting a second glance?

Some cities and towns hold Halloween parades. Folks decorate their houses with harvest or scary themes (especially in colors like soot **black**, bone **white**, and pumpkin **orange**): scarecrows, **pumpkins**, skeletons, black **cats**, cobwebs with huge spiders, and **bats** in the rafters are all popular. Countless pumpkins are sacrificed as **jack-o'-lanterns**. You can go on ghost tours, visit **haunted** houses, stay warm around a **bonfire**, watch **horror** movies, read **scary** stories, get **messy** with **apple** bobbing, drink hot apple **cider**, and get a bellyache from too much sweet stuff! **Candy corn**, pumpkin pie, candy apples, popcorn, and Halloween-colored candies are some of the treats up for grabs.

Puzzle 37: Tip of the Slung

Difficulty Level: Medium

Spoonerisms are **slips** of the tongue where the first parts of two words (or syllables within one word) are **swapped**. You may commit one of these verbal slipups accidentally or on **purpose** as fun **wordplay**. For example, a *butterfly* turns into a ***flutterby***, and the *speed of light* becomes the ***lead of spite***. The technical term for this transposition is **metaphasis**.

Spoonerisms get their name from the Reverend William Spooner, the Anglican priest and scholar who lectured in **divinity**, philosophy, and history at **Oxford** University in **London**. Spooner was a well-liked **professor**, if somewhat absent-minded. Though he does seem to have often **muddled** his words, many doubt that he said *all* of the quotations attributed to him. The following are some of the **classic** spoonerisms:

- "Let us raise our glasses to the queer old **dean**" (the dear old Queen)
- "Young man, you have hissed my mystery lectures (missed my history lectures) and tasted **two worms** (wasted two terms)!"
- "Which of us has not felt in his heart a **half-warmed fish** (half-formed wish)?"
- "A well-boiled **icicle**" (A well-oiled bicycle)
- "Our **shoving** leopard" (Our loving shepherd)

Creating spoonerisms is a fun game to play; many Web sites and books collect **clever** and **apt** transpositions. Ideally, the transposed words should form proper words, not nonsense words (for instance, *growing vegetables* turns into *vowing **gregatables***). However, there are no hard and fast rules.

Here are a few more spoonerisms to enjoy; see if you can figure out what they're meant to say. (If you get stuck, check out `www.fun-with-words.com/spoon_example.html` for some help.)

- Fighting a liar
- One swell **foop**
- **Cattle** ships and bruisers
- **Tow and shell**
- Have the **hags** flung out
- Dow the **thrice**
- Please **hush my brat**
- **Logged** over
- **Wave** the sails
- A lack of **pies**

Puzzle 38: How to Spot a Hoax E-mail

Difficulty Level: Hard

E-mail is a mixed blessing — it's a wonderful way to stay in touch with family, friends, and colleagues, but a **huge** amount of **rubbish** comes in every day, sometimes far outweighing the real messages. Almost every chain e-mail, warning about a new **toxin** lurking in your home, **health** scare, computer **virus** alert, advertisement, or great new business offer is a hoax, **scam**, urban legend, or **fake** of some sort. Approach with **caution**!

Before forwarding a message, **check** its credentials. See whether it appears on one of the many hoax-busting sites such as **Snopes** (`www.snopes.com`) or **Urban** Legends (`urban legends.about.com`). These **sites** have a great deal of information on how to **spot** the fakes, as well as **lists** of the legitimate e-mails making the rounds.

Other warning signs are **mispeld tixt**, ALL **CAPS**, and lots of exclamation marks!!!!! If the author pleads with you to "send this message to everyone in your address book," you can automatically hit the **delete** key.

Never *ever* reply to a spam or **hoax** e-mail, whether to voice your annoyance or **request** to be removed from the mailing list. This mistake only serves to confirm your e-mail address with the spammer, and you'll never hear the end of it.

Even if you want to buy what a spam e-mail is **selling**, don't do it under any circumstances! Spammers use **fraudulent** business practices, and honestly, who wants to encourage them?

Phishing is a technique in which scammers try to get you to send them your banking details, **passwords**, and other personal details. These e-mails generally look like they're from your bank, **eBay**, the **IRS**, and so on; they say you have a problem that needs to be fixed and direct you to a Web site asking you for your account information. Again, don't open these e-mails or click on any links in them. How can you tell what's phishy and what isn't? One clue is that phishing e-mails don't have your full name in the text. A real e-mail from your **bank** or eBay would be addressed to you properly.

You may also consider taking the "**Boulder Pledge**," written by Roger Ebert in 1996: "Under no circumstances will I ever purchase anything offered to me as the result of an unsolicited e-mail message. Nor will I forward **chain** letters, petitions, **mass** mailings, or virus warnings to large numbers of others. This is my contribution to the **survival** of the **online** community."

If you're interested in finding more about avoiding spam, I recommend the **Skeptoid** podcast by Brian Dunning (`skeptoid.com`), and the **Spam** Primer by Randy Cassingham (`www.spamprimer.com`).

Puzzle 39: Hop, Skip, and Jump

Difficulty Level: Hard

In **Australia**, *marsupials* (mammals whose offspring develop in pouches) are more common than the placental **mammals**. A female marsupial's **baby** is born when it's only a **few weeks** old and still very small. It then crawls into her **pouch**, attaches itself to a nipple, and completes its **growth** inside the pouch.

Macropods (*macro* meaning "large" and *pod* meaning "foot") are **hopping** marsupials. They range from the **kangaroos** to the smaller **wallabies**, tree-kangaroos, pademelons, and **quokkas**, which are only as big as a **cat**. All macropods are herbivorous, and most are nocturnal.

North America is home to only one marsupial: the possum. In Australia, however, the possum family is large, with around **sixty** species ranging from the tiny **pygmy possum** (less than five inches long) and **cute** sugar glider to the largest of them all, the common brushtail possum.

The **brushtail possum** has **adapted** to city life, sleeping in tree hollows during the day and visiting gardens at night. It loves sweet treats and can destroy vegetable gardens and fruit on trees. Males make **loud** territorial **calls** at night, **grunting**, coughing, screeching, and hissing enough to give anyone nightmares!

The *bilby* is an endangered long-eared, desert-burrowing marsupial. In Australia, the **Easter Bilby** is gaining popularity over the Easter Bunny — especially because rabbits have caused so much damage to the continent.

Other unusual Australian marsupials include the **numbat**, a small ***diurnal*** (opposite of nocturnal) striped animal that lives on termites and is the only marsupial *without* a pouch; **bandicoots**, which are related to bilbies; the large and **solid** burrowing **wombats**; two species of blind marsupial **moles** that burrow through the desert **sands** of Western Australia; the endangered potoroos; **bettongs**, also known as rat-kangaroos; the shrew-like **antechinus**; the tiny mouse-like **dunnarts**; the feisty Tasmanian devil, the largest **carnivorous** marsupial in the world; the well-known **koalas**, which live on **eucalyptus** leaves and sleep for most of the day; and six species of spotted **quolls,** or native cats.

Puzzle 40: Highs and Lows

Difficulty Level: Hard

Look out! There is one extra bold word in this story that isn't in the grid — can you spot it?

Diabetes is a series of conditions that are involved with **insulin** and the pancreas. Insulin is a **vital** hormone that acts like a **key**, allowing sugars in the bloodstream to move into the **cells** of the body. You've got to have insulin to live!

Type 2 diabetes is the most common form. It is a metabolic disorder — the pancreas is typically still producing insulin, but the body is **resistant** to it. Type 1 diabetes, on the other hand, is an autoimmune **disease**. The body destroys the insulin-producing cells in the **pancreas**, so the pancreas can no longer produce the **hormone** at all. This disease generally first shows up in **children** or teenagers. It is **deadly**.

Type 1 diabetics are dependent on frequent fingerprick blood **tests**, to check their **blood** sugar level, and insulin **injections** every time they eat, for the rest of their lives. Both high blood sugar (**hyperglycemia**) and low blood sugar (**hypoglycemia**) are dangerous. A diabetic's life is a never-ending **tightrope** act between these two **extremes**, trying to maintain good blood sugar balance.

Treatment for Type 1 diabetes is **advanced** — as long as sufferers inject insulin before they eat, they can generally simply eat a **healthy** diet. They can enjoy a wide variety of foods, including **sugar** and other **sweet** things, as long as they **accurately** calculate how much **carbohydrate** they're eating, and **adjust** their insulin.

Insulin **pens** make insulin injections relatively quick and easy. Insulin **pumps**, which allow **easier** and more accurate insulin delivery, without the need for daily needles, are another great advance.

Still, there are no holidays from this disease; a **lapse** can result in **hospitalization**, serious complications such as **blindness**, or worse.

Research programs around the world are trying to find out why Type 1 diabetes occurs, and **why** rates are rising. Diabetics haven't lived unhealthy lives, they haven't lived on sweets and sodas, and their parents haven't done anything wrong. They just got sick, often out of the blue. There are endless efforts looking for a **cure**, and many exciting new possibilities. We can only hope that we're living in the era when a cure will be found for this life-threatening disease.

Puzzle 41: Obscure Vocabulary

Difficulty Level: Hard

Look out! I've included four extra words here that aren't in the grid.

There are thousands of **weird** words out there — many are old-fashioned and have fallen out of use, but others are **obscure** terms or unusual **jargon**. Some of these words deserve to be slipped into your **daily** conversation — if nothing else, they can **gain** admiration from your friends and **befuddle** your enemies! One of my favorites is ***trottoir*** — a much cuter word for sidewalk originating from French. Here are few other **gems** to try out:

You can call that annoying kid (you know who I mean) a ***limaceous*** child, meaning you think he's slug-like. He's probably also ***otiose*** (idle and useless), ***tritical*** (trite), and a ***fabulist*** (liar).

If you're very **lucky**, you may have a partner who's keen on ***abliguration*** — extravagant cooking. This may lead to a ***nimiety*** (surplus) of food, though, so be prepared to become ***zaftig*** (desirably curvaceous and pleasingly **plump**). Whenever you come across marzipan, make sure you call it ***marchpane***.

I'm sure you know someone who is an ***ailurophile*** — he or she is abnormally fond of cats. ***Halieutics*** is the art of fishing, and to ***bombilate*** is to make a buzzing or droning sound.

These medical terms can come in handy, especially if you're just a little **ill**, but want it to sound worse: ***Pyrexia*** is another term for fever, and ***cardialgia*** — although it sounds serious — is just heartburn or mild indigestion. The snake-entwined **rod** that symbolizes medicine is a ***caduceus***.

Ataraxia sounds like some sort of medical condition, but it actually means absolute tranquility and **freedom** from all worries. ***Ergasiophobia*** is the fear of working or **work** in general. You can combine these terms quite effectively: "Please, sir, I need a lengthy vacation to treat my ergasiophobia and ataraxia."

If you get hooked on **unusual** words, you can find many dictionaries on the **Internet** and in print. Just make sure you use **your** superior vocabulary powers for good! ***Gramercy*** (thank you)!

Chapter 5

Finding Hidden Words in Your Puzzles

Hidden Words is another very common variety of word search. The words appear in the standard eight directions, but they're more solidly packed and overlap more frequently.

As with most searches, you end up with a few unclaimed letters in the grid after you find all the list words. These leftover letters hold the key; they spell out a hidden message, usually when you look at them in *normal reading order* (left to right, row by row from the top to the bottom). The hidden message can be one or two words, or even a whole sentence in bigger puzzles. Figure 5-1 shows you an example of an Australian-themed word search; the leftover letters spell out Australia's national capital.

Draw a circle around the leftover letters, or mark them in some other way (perhaps another colored highlighter). Go through the grid again carefully if the letters don't spell anything — it's easy to miss a letter here and there.

In harder Hidden Words puzzles, the leftover letters may be jumbled up, in which case you need to unscramble them to get the final answer. That's just an added bit of complexity to annoy — I mean, *challenge* — you. I let you know if the hidden answer is jumbled in this chapter's puzzles. Additionally, some puzzles have extra list words; I give you a heads up on this, too.

Puzzle 66: On the Links

Difficulty Level: Hard

The 54 leftover letters reveal an apt quotation by H.G. Wells. Look out, though — you have to unscramble the final message! I give you a few letters in the blanks to help you on the way.

Puzzle 69: In Other Words

Difficulty Level: Hard

These words are all either common phrases in a range of languages or words from other languages used in English. The word list includes one extra word that doesn't appear in the grid. The 33 leftover letters spell out the translation of this handy Indonesian sentence: "Maaf, Nona, ada bebek di atas kepala anda!"

Chapter 6

Solving Secret Shapes

I'm rather partial to these word searches (but then again, I invented them, so maybe I'm not the most objective judge). Secret Shapes are very similar to the Hidden Words puzzles, but they use a drawn grid so that each letter sits in a box.

After you complete the puzzle normally, you have leftover letters, but they don't spell out any sort of message. Instead, you now *color in* the leftover letter squares (like in Figure 6-1) to discover a little picture! Another method for solving these puzzles is to lightly shade in the letter squares as you discover the words, and leave the shape uncolored.

The word list on each of these puzzles includes one word that gives the name of the Secret Shape so you know that you've got it right (or that you need to keep looking).

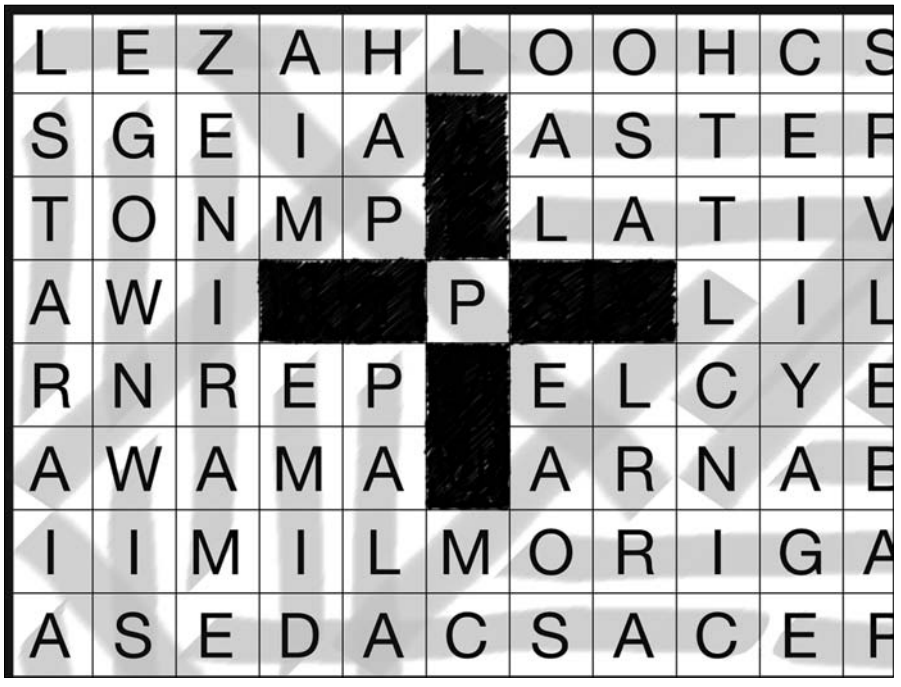

Figure 6-1: Coloring in the leftover letters reveals a shape!

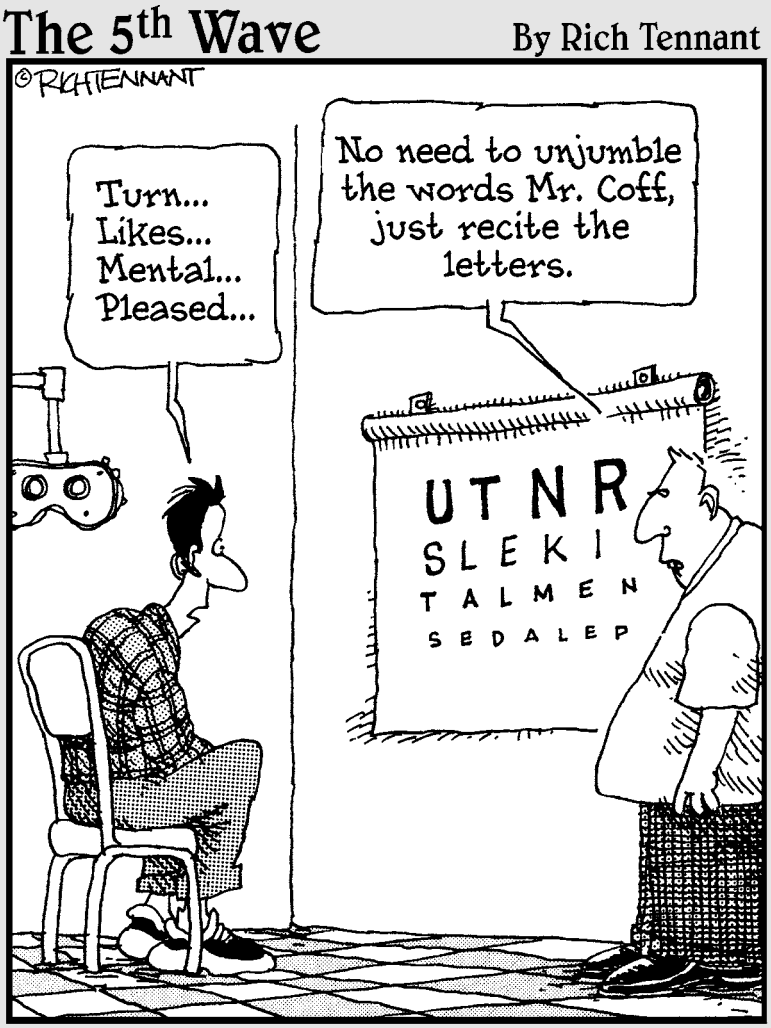
Part III

Moving On to Complex Puzzles



In this part . . .

Here are the challenging puzzles! In this part, you can find the Scrambled and Winder Words and Quiz and Secret List Word Searches, as well as a chapter of anagram puzzles. The puzzles in this part come in Easy, Medium, and Hard difficulty levels, so you can ease into each variety and hone your skills.

Don't be put off just because these puzzles are "complex" — they're really just simple puzzles with a little extra twist (literally, in the case of Winder Words). After all, variety is the spice of life. Just be sure to read any introductory text carefully for special instructions.

Chapter 7

Gathering Your Wits for Scrambled Searches

You notice the difference with this type of word search right away — the word list is gobbledygook! Your first challenge with one of these puzzles is to unscramble each word. Then you can get down to finding the words in the grid.

Each scrambled word contains the letters for the unscrambled word in its entirety (but nothing else). Each word is scrambled individually — the letters from other words on the list haven't been mixed in too.

Here are some strategies for unscrambling words. You need some scrap paper and a pen or pencil:

- Write the letters in a circle, or write the scrambled word backward.
- Write the vowels in one group, and the consonants in another.
- Look for common letter patterns. See Chapter 14 for some helpful lists.
- If you like to play around with technology, and your brain hurts from these dratted muddled letters, you can find many online anagram solvers. Simply type "solve anagrams online" into the search engine of your choice and take your pick! Here are a few to get you started:
  - **Crossword Dictionary Online:** `www.crossword-dictionary.com/anagram.asp`
  - **Internet Anagram Server:** `wordsmith.org/anagram/`
  - **One Across:** `www.oneacross.com/anagrams/`
  - **The Anagram Engine:** `www.easypeasy.com/anagrams/`
  - **Zyzzyva** (a free downloadable program): `www.zyzzyva.net`

Puzzle 136: Tropical Fish

Difficulty Level: Hard

Unscramble the names of these tropical aquarium fish and find them in the grid. The list is *not* in alphabetical order, and I snuck one fish into the list even though it isn't in the grid.

Chapter 8

Are You Ready for Some Quiz Words?

Quiz Word Searches involve more mental effort than most word searches. They have letter grids, but no word lists. Instead they present you with a series of numbered quiz questions to answer, and the answers become your word list for the word search. These puzzles are a bit like a crossword in some ways — you have to answer the questions before you can complete the puzzle.

The Quiz Word Searches in this book range from small grids with easier quiz questions to large grids with downright difficult clues.

If you get stuck at any point, refer to the hints section in Chapter 12 — I give you the answer to at least one quiz question from each puzzle so you don't have to head to the answers section right away.

These puzzles have two aspects: the quiz and the word search. I give you details about each in the following sections. But here's the simplest explanation of these puzzles: All you need to do is answer the questions, and then find them in the grid. Each clue has the number of letters in parentheses after it, and the answers usually appear in alphabetical order (I tell you when this isn't the case).

Taking the Quiz

You need your general knowledge to solve the quiz questions. You may need to rope in a spare brain (usually attached to a friend), or do some research for the harder puzzles in this section.

Feel free to use the Internet or reference books such as a dictionary, encyclopedia, or atlas to search for answers. You're not cheating in any way, I promise!

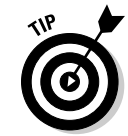
The puzzle may not have enough room for you to write your answers/word list, so you may need a sheet of scrap paper.

A pencil and eraser are advisable for these more difficult puzzles, especially for writing out the quiz answers.

Turning to the Grid

When you have your answers, search for the words in the letter grid by using the standard word search methods covered in Chapter 2.

If you really can't find one of your answers in the grid, you may need to consider the rather galling possibility that your answer is incorrect. Don't take it hard; just reconsider the clue and try again. No one needs to know (and I certainly won't tell anyone).



If you're getting very stuck, try scanning the grid for words to see whether anything pops out at you. You can then match up any words you find with the quiz questions they (hopefully) answer. This method is perfectly valid and is just as challenging to the brain.

Be careful — word search grids hold many more accidentally created words than those on the word list. Make sure that any words you discover this way really are the answers to your quiz questions!

Puzzle 137: Fictional Fauna

Difficulty Level: Easy

Puzzle 160: A Sunny Outlook

Difficulty Level: Hard

Solve the questions, and then find your answers in the grid. The clue answers are *not* in alphabetical order, and you have to contend with an extra word that isn't in the grid!

1. Very strong wind (4) _ _ _ _

2. Measurement of how much an object reflects sunlight (6) _ _ _ _ _ _

3. Water droplets suspended in the air (4) _ _ _ _

4. Column of warm, rising air (7) _ _ _ _ _ _ _

5. Way of categorizing wind speed based on visual conditions (8, 5) _ _ _ _ _ _ _ _ _ _ _ _ _

6. Long region of lower atmospheric pressure (6) _ _ _ _ _ _

7. Dangerous clear, frozen water on roads (5, 3) _ _ _ _ _ _ _ _

8. Device for measuring wind speed (10) _ _ _ _ _ _ _ _ _ _

9. Sudden violent burst of wind (6) _ _ _ _ _ _

10. Temperature at which water vapor will condense on a surface (3, 5) _ _ _ _ _ _ _ _

11. Extended time of below-average precipitation (7) _ _ _ _ _ _ _

12. Weather cycle driven by ocean temperature changes (2, 4) _ _ _ _ _ _

13. Standard for describing strength of sun's rays on a given day (2, 5) _ _ _ _ _ _ _

14. Study of weather and forecasting (11) _ _ _ _ _ _ _ _ _ _ _

15. Water overflow (5) _ _ _ _ _

16. Thin, uniform, high clouds (12) _ _ _ _ _ _ _ _ _ _ _ _

17. Balls of ice falling as precipitation (4) _ _ _ _

18. A gentle wind (6) _ _ _ _ _ _

19. Map lines connecting areas of equal atmospheric pressure (7) _ _ _ _ _ _ _

20. Informal name for wispy cirrus cloud (5, 4) _ _ _ _ ' _ _ _ _

21. Precipitation of ice pellets (5) _ _ _ _ _

22. Lowest section of the Earth's atmosphere (11) _ _ _ _ _ _ _ _ _ _ _

23. Solid dark gray rain cloud (12) _ _ _ _ _ _ _ _ _ _ _ _

24. Thick cloud bank on the ground (3) _ _ _

25. Violently rotating column of air (7) _ _ _ _ _ _ _

26. Result of air scattering short-wavelength light (4, 3) _ _ _ _ _ _ _

27. Storm that forms along the East Coast of North America (9) _ _ _ ' _ _ _ _ _ _

28. Phenomenon from light hitting water droplets in the air (7) _ _ _ _ _ _ _

29. Long region of higher air pressure (5) _ _ _ _ _

30. Go from directly from snow to water vapor, without melting (9) _ _ _ _ _ _ _ _ _

31. "Fair weather" clouds (7, 7) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

32. Ice crystals forming on cold clear nights (4, 5) _ _ _ _ _ _ _ _ _ _

33. Precipitation that can be powder or packing (4) _ _ _ _

34. Heavy rainfall (8) _ _ _ _ _ _ _ _

35. Factor affecting the apparent temperature (4, 5) _ _ _ _ _ _ _ _ _ _

36. Sound made by lightning (7) _ _ _ _ _ _ _

37. A cloud that produces precipitation (6) _ _ _ _ _ _

38. Warm foehn wind in the Rockies (7) _ _ _ _ _ _ _

39. Tornado occurring over the ocean (10) _ _ _ _ _ _ _ _ _ _

40. Brief fall of rain (6) _ _ _ _ _ _

Puzzle 161: See the World

Difficulty Level: Hard

The leftover letters spell out an apt quotation from Mark Twain.

1. Capital of Ghana (5) _ _ _ _ _
2. Algerian capital city (7) _ _ _ _ _ _ _
3. Capital of Madagascar (12) _ _ _ _ _ _ _ _ _ _ _ _
4. West Indies island, also known as Wadadli (7) _ _ _ _ _ _ _
5. Capital of Eritrea (6) _ _ _ _ _ _
6. Capital of Greece (6) _ _ _ _ _ _
7. Thailand's capital city (7) _ _ _ _ _ _ _
8. Swiss capital (4) _ _ _ _
9. Australian capital city (8) _ _ _ _ _ _ _ _
10. Capital of Denmark (10) _ _ _ _ _ _ _ _ _ _
11. European nation bordered by Poland and Germany (5, 8) _ _ _ _ _ _ _ _ _ _ _ _ _
12. City that is home to the Akshardham (5) _ _ _ _ _
13. Capital of Tajikistan (8) _ _ _ _ _ _ _ _
14. Country with capital Tallinn (7) _ _ _ _ _ _ _
15. Landlocked country; capital Addis Ababa (8) _ _ _ _ _ _ _ _
16. Swiss "global city" (6) _ _ _ _ _ _
17. British territory on the Iberian Peninsula (9) _ _ _ _ _ _ _ _ _
18. World's largest island; capital Nuuk (9) _ _ _ _ _ _ _ _ _
19. Capital of Vietnam (5) _ _ _ _ _
20. Country bordered, in part, by Pakistan and Burma (5) _ _ _ _ _
21. Self-governing Crown dependency; capital Douglas (4, 2, 3) _ _ _ _ _ _ _ _ _
22. Capital of Indonesia (7) _ _ _ _ _ _ _
23. Tiny country bordered by Switzerland and Austria (13) _ _ _ _ _ _ _ _ _ _ _ _ _
24. Capital city of Slovenia (9) _ _ _ _ _ _ _ _ _
25. Belarusian capital (5) _ _ _ _ _
26. Southeastern European country; capital Podgorica (10) _ _ _ _ _ _ _ _ _ _
27. Burma, or the Union of _____ (7) _ _ _ _ _ _ _
28. Capital of Kenya (7) _ _ _ _ _ _ _
29. Smallest island nation in the world (5) _ _ _ _ _
30. County with capital Kathmandu (5) _ _ _ _ _
31. De facto republic; capital Nicosia (8, 6) _ _ _ _ _ _ _ _ _ _ _ _ _ _
32. Constitutional monarchy; capital Oslo (6) _ _ _ _ _ _
33. Capital of Mauritania (10) _ _ _ _ _ _ _ _ _ _
34. New Caledonia's capital city (6) _ _ _ _ _ _
35. Country with capital Islamabad (8) _ _ _ _ _ _ _ _
36. Capital of Cambodia (5, 4) _ _ _ _ _ _ _ _ _
37. South Dakota's capital city (6) _ _ _ _ _ _
38. Capital of Trinidad and Tobago (4, 2, 5) _ _ _ _ _ _ _ _ _ _ _ _ _
39. Country with capital Lisbon (8) _ _ _ _ _ _ _ _
40. Capital city of #11 (6) _ _ _ _ _ _
41. Capital of Iceland (9) _ _ _ _ _ _ _ _ _
42. Latvian capital (4) _ _ _ _
43. The Eternal City (4) _ _ _ _
44. Caribbean island divided between the Netherlands Antilles and France (5, 6) _ _ _ _ _ _ _ _ _ _ _
45. Capital of São Tomé and Príncipe (3, 4) _ _ _ _ _ _ _
46. United Kingdom country, capital Edinburgh (8) _ _ _ _ _ _ _ _
47. Balkan country, capital Belgrade (6) _ _ _ _ _ _
48. Largest city in China (8) _ _ _ _ _ _ _ _
49. Judicial capital of Bolivia (5) _ _ _ _ _
50. Capital of Taiwan (6) _ _ _ _ _ _
51. Iran's capital city (6) _ _ _ _ _ _
52. Seat of the Dutch government (3, 5) _ _ _ _ _ _ _ _
53. Island divided into East and West, in the Lesser Sunda Islands (5) _ _ _ _ _
54. Informal name of country; capital Lomé (4) _ _ _ _
55. Eurasian country with capital Ankara (6) _ _ _ _ _ _
56. Tiny Polynesian nation; capital Funafuti (6) _ _ _ _ _ _
57. Capital city of Malta (8) _ _ _ _ _ _ _ _
58. Saint _____ and the Grenadines (7) _ _ _ _ _ _ _
59. Capital of Namibia (8) _ _ _ _ _ _ _ _
60. Country whose capital is Sana'a (5) _ _ _ _ _

Puzzle 165: Bon Appetit!

Difficulty Level: Hard

The leftover letters spell out some sound advice. This puzzle has one extra word.

1. The French name for eggplant (9) _ _ _ _ _ _ _ _ _
2. Father of American gastronomy (5) _ _ _ _ _
3. Condiment made from vinegar, wine, tarragon, and egg yolks (9, 5) _ _ _ _ _ _ _ _ _ _ _ _ _ _
4. Mild semisoft Italian cheese (3, 5) _ _ _ _ _ _ _ _
5. Plunge fresh produce into boiling and then cold water (6) _ _ _ _ _ _
6. Beat ingredients together well (5) _ _ _ _ _
7. Classic Marseille fish stew (13) _ _ _ _ _ _ _ _ _ _ _ _ _
8. Bundle of herbs removed at the end of cooking (7, 5) _ _ _ _ _ _ _ _ _ _ _ _ _
9. Red wine grape variety (8, 9) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _
10. Braided Jewish bread (7) _ _ _ _ _ _ _
11. Cook who introduced French cuisine to America (5) _ _ _ _ _
12. Fine conical metal sieve (8) _ _ _ _ _ _ _ _
13. An Italian white bread with a crisp crust (8) _ _ _ _ _ _ _ _
14. Puréed and strained fruit or vegetable sauce (6) _ _ _ _ _ _
15. Spicy smoked Hungarian sausage (6) _ _ _ _ _ _
16. British author of *How to Cheat at Cooking* (5, 5) _ _ _ _ _ _ _ _ _ _
17. Cuts food into tiny cubes (5) _ _ _ _ _
18. Herb often paired with fish (4) _ _ _ _
19. Eat dinner (4) _ _ _ _
20. French term for food cooked on skewers (2, 9) _ _ _ _ _ _ _ _ _ _ _
21. Legendary chef who wrote *Le guide culinaire* (9) _ _ _ _ _ _ _ _ _
22. Greek curd cheese (4) _ _ _ _
23. Chocolate and cream icing (7) _ _ _ _ _ _ _
24. Small Italian dumplings (7) _ _ _ _ _ _ _
25. Hungarian stew with beef and paprika (7) _ _ _ _ _ _ _
26. Sweet plum cultivar (9) _ _ _ _ _ _ _ _ _
27. Small game bird (6) _ _ _ _ _ _
28. Rich Swiss cheese (7) _ _ _ _ _ _ _
29. Creamy sauce used in Eggs Benedict (11) _ _ _ _ _ _ _ _ _ _ _
30. Miniature citrus fruit (7) _ _ _ _ _ _ _
31. Beaten egg white and sugar mixture (8) _ _ _ _ _ _ _ _
32. Influential vegetarian restaurant in Ithaca, New York (9) _ _ _ _ _ _ _ _ _
33. Rotary grater (5) _ _ _ _ _
34. Large variety of raisin (6) _ _ _ _ _ _
35. Asian name of the Asian pear (5) _ _ _ _ _
36. Small white bean (4) _ _ _ _
37. Confectionary made from beaten egg white, sugar, and nuts (6) _ _ _ _ _ _
38. Spice often used in eggnog and cheese sauces (6) _ _ _ _ _ _
39. The main ingredient in Htapothi sti Skhara (7) _ _ _ _ _ _ _
40. Delicacy eaten on the half shell (6) _ _ _ _ _ _
41. Spanish rice-based dish (6) _ _ _ _ _ _
42. The chef who created *Truffle soup V.G.E.* (4, 6) _ _ _ _ _ _ _ _ _ _
43. Mortar's partner (6) _ _ _ _ _ _
44. Fried rice dish often served with Indian curries (5) _ _ _ _ _
45. Cook in barely-boiling liquid (5) _ _ _ _ _
46. Popular material for fine dinnerware (9) _ _ _ _ _ _ _ _ _
47. Soft cheese similar to sour cream (5) _ _ _ _ _
48. Rich French slow-cooked stew (6) _ _ _ _ _ _
49. Tropical fruit also known as the achotillo (8) _ _ _ _ _ _ _ _
50. Small ceramic dish for individual servings (7) _ _ _ _ _ _ _
51. Flour and butter mixture used in thickening sauces (4) _ _ _ _
52. French name for Zabaglione (7) _ _ _ _ _ _ _
53. Small stuffed Indian pastry (6) _ _ _ _ _ _
54. Japanese mushroom (8) _ _ _ _ _ _ _ _
55. Asian vegetables, also called *mange-tout* (4, 4) _ _ _ _ _ _ _ _
56. Dish of raw beef with egg yolk and capers (5, 7) _ _ _ _ _ _ _ _ _ _ _ _
57. Popular Japanese "steamboat" dish (8) _ _ _ _ _ _ _ _
58. British berry and bread dessert (6, 7) _ _ _ _ _ _ _ _ _ _ _ _ _
59. Middle Eastern dish of bulghur wheat and parsley, var (7) _ _ _ _ _ _ _
60. Spiced Moroccan stew (6) _ _ _ _ _ _
61. Staple Hawaiian food (4) _ _ _ _
62. Herb widely used in Mediterranean cooking (5) _ _ _ _ _
63. Main ingredient in tonnato sauce (4) _ _ _ _
64. The celebrity chef team of Clarissa Dickson Wright and Jennifer Paterson (3, 3, 6) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _
65. Cow's milk rind cheese made in France and Switzerland (8) _ _ _ _ _ _ _ _
66. The only grape used to make Condrieu wine (8) _ _ _ _ _ _ _ _
67. Asian cooking vessel (3) _ _ _

Puzzle 166: The Living Kingdom

Difficulty Level: Hard

I admit it, this last quiz is very, *very* difficult! It was even hard to write! Answer the questions, using whatever references you need, and then find the words in the grid (or work backward from the grid to the quiz). The clue answers are *not* arranged in alphabetical order.

1. Wagtail and longclaw's family (12) _ _ _ _ _ _ _ _ _ _ _ _
2. Phylum of flatworms (15) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _
3. Moss animals, or sea mats (7) _ _ _ _ _ _ _
4. Genus of popular aquarium fish: family Cyprinidae, subfamily Danioninae (5) _ _ _ _ _
5. Genus of all horse-like animals (5) _ _ _ _ _
6. Phylum that includes insects, arachnids, and crustaceans (10) _ _ _ _ _ _ _ _ _ _
7. Chondrichthyes are also known as _____ (13, 4) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _
8. Grouping of animals that includes brittle stars and sea urchins (11) _ _ _ _ _ _ _ _ _ _ _
9. Phylum of over 9,000 species, including jellyfish and corals (8) _ _ _ _ _ _ _ _
10. Small animals from the family Macroscelididae (8, 6) _ _ _ _ _ _ _ _ _ _ _ _ _ _
11. The mulberry and fig family (8) _ _ _ _ _ _ _ _
12. Order of bats meaning *hand wing* (10) _ _ _ _ _ _ _ _ _ _
13. Plants from the genus Taxus (4) _ _ _ _
14. Two types of animals within the Anura order (5, 3, 5) _ _ _ _ _ _ _ _ _ _ _ _ _ _ _
15. Order containing cuckoos (12) _ _ _ _ _ _ _ _ _ _ _ _
16. Animals from the subfamily Erinaceinae (9) _ _ _ _ _ _ _ _ _
17. Hares and jackrabbits belong to this genus (5) _ _ _ _ _
18. Taxonomic rank between class and family (5) _ _ _ _ _
19. Group of flowering plants including nutmeg, cinnamon, and avocado (10) _ _ _ _ _ _ _ _ _ _
20. Family containing five species of rhinos (14) _ _ _ _ _ _ _ _ _ _ _ _ _ _
21. Phylum of animals who all have a spinal cord of some sort (8) _ _ _ _ _ _ _ _
22. The common name for passerines (8, 5) _ _ _ _ _ _ _ _ _ _ _ _ _ _
23. The cat family (7) _ _ _ _ _ _ _
24. The botanical equivalent of a phylum (8) _ _ _ _ _ _ _ _
25. The walrus is the only living species of this family (10) _ _ _ _ _ _ _ _ _ _
26. Class of fungi that includes the order Mucorales (10) _ _ _ _ _ _ _ _ _ _
27. Animals of the Lutrinae subfamily (6) _ _ _ _ _ _
28. Order containing grapes and Virginia creeper (7) _ _ _ _ _ _ _
29. Type of sharks in the family Squalidae (7) _ _ _ _ _ _ _
30. Large birds from the genus Corvus (6) _ _ _ _ _ _
31. Swedish scientist who established modern taxonomy (8) _ _ _ _ _ _ _ _
32. Phylum of microscopic and tiny animals (8) _ _ _ _ _ _ _ _
33. The genus of humpback dolphins (5) _ _ _ _ _
34. The science of classification (8) _ _ _ _ _ _ _ _
35. Mammals in the family Phocidae (4, 5) _ _ _ _ _ _ _ _ _
36. Hoofed animals (9) _ _ _ _ _ _ _ _ _
37. Class of birds (4) _ _ _ _
38. Plants of the Nymphaeaceae family (5, 6) _ _ _ _ _ _ _ _ _ _ _
39. "Living fossil" plant that is the only species in its division, class, order, family, and genus (6) _ _ _ _ _ _
40. Well-known fish in the family Characidae (6) _ _ _ _ _ _

Chapter 9

Solving Secret List Word Searches

These puzzles are probably the hardest in the book: I've hidden a whole list of words in a letter grid as usual, but I don't give you the word list *at all*. How mean is that? To soften the blow, I do tell you the theme of each puzzle, how many words you need to find, and how long each word is. Easy and Medium puzzles have their word lists in alphabetical order and have hint letters scattered through.

Follow these steps to solve a Secret List Word Search:

1. **Gather your information.**

   Familiarize yourself with the number of words you need to find and what the topic is. If the puzzle gives you any other information (such as word lengths, hint letters, and so on), make a note of this as well.

2. **Brainstorm possible examples that fit the theme.**

   If the topic is one you're familiar with, jot down the words you know off the top of your head. Think on the subject a bit longer — can you remember any other words? You may know of some others but not be sure of the spelling. Check your dictionary, a favorite book on the subject, or some Web sites if you need backup.

3. **Check the letter grid for your brainstormed words.**

   They're probably there. You can also scan the grid to see whether anything pops out that refreshes your memory. As long as the words you find relate to the theme, you can be pretty confident they're the ones you're looking for.

4. **If you're still stuck, walk away for a while.**

   These puzzles are supposed to be fun! Don't turn to the answer page right away. Move on to another puzzle if you're getting very frustrated.

If you leave your brain with a problem, it does its best to come up with the goods after some sleep. The effect is well-known, and one you can take advantage of. Go over the problem just before you go to sleep, and keep a notebook and pen next to your bed to catch that moment of inspiration!

Puzzle 167: Flying Colors

Difficulty Level: Easy

In this grid are the names of 14 colors. To get you started, I give you the starting letter for each word and dashes indicating how long the words are.

W	S	M	A	Y	P	A	K	B	I	O	M	F

Puzzle 190: Vivacious Verbosity

Difficulty Level: Hard

This puzzle contains 33 words starting with the letter *V.* All words are at least four letters long. You may find three-letter words in the grid, but they're not included in the answers.

To help you narrow it down, here's a hint: The list includes nine words with four letters; four words with five letters; five words with six letters; six words with seven letters; four words with eight letters; three words with nine letters; one word with ten letters; and one word with eleven letters.

Chapter 10

Weaving Your Way through Winder Words

This sort of word search puzzle differs from other kinds in a very fundamental way: Instead of running in straight lines, these words can twist through the letter grid turning at right angles (but not along diagonals). The letters can overlap, too.

The earliest word search puzzles were first published in the mid-1800s, and they were often similar to this style of puzzle. The compiler would generally fit a whole quotation into a square, along a winding path. Check out Chapter 1 for an example of these early puzzles. These winding word puzzles were the forerunner of the standard word search puzzles you're more familiar with. You can find the modern version of these puzzles in a variety of puzzle publications, so you may well be familiar with them under a different name.

Solving these devils requires slightly different searching methods than you need for other word searches. Instead of looking along a straight line after you find the first letter of a word, you need to keep checking around every letter in the word. However, you don't have to do a full circle check because the words don't turn on the diagonal; just check the letter above, below, and to either side in a *cross* or *T check*.

You may discover the occasional alternative answer path for some words — that's perfectly fine. The answers in Chapter 13 are the pathways I designed for the puzzles, but if you find a different answer, that's valid too. Most of these puzzles don't have hidden meanings, so choosing a different path won't create any problems.

Puzzle 196: Twisty Fruity

Difficulty Level: Easy

I highlighted one of the words in the grid to help you get started.

APRICOT
APPLE
AVOCADO
BANANA
BLUEBERRY
CASHEW
CHERRY
~~COCONUT~~
FIG
GRAPE
LEMON
LONGAN
MANGO
PECAN
QUINCE
TOMATO

Chapter 11

Discovering Anagrams and Other Word Games

This chapter presents four different sorts of word puzzles to challenge your brain:

- **Mix-Ups** have a 3-x-3, 4-x-4, or extra hard 5-x-5 grid of random letters. Find words within the grid by moving from one adjacent letter to another without reusing the same square in any given word. You can move in any direction, including diagonally. Add a time limit to up the challenge for yourself!
- **Muddled Words** require you to rearrange any or all of the seven given letters into as many words as you can, using each letter only once.
- **Daisy Words** ask you to rearrange the letters on the daisy petals into as many words as possible without repeating letters. The catch: The letter on the shaded petal must appear in every word.
- **Anagrams** give you weird phrases that you must rearrange to form particular words according to the theme. Each anagram has a single answer; you don't need to find a list of all possible words.

Words must be at least three letters long — no proper nouns allowed!

See Chapter 2 for tips and tricks to help you solve these and other anagram-style puzzles. The letter pattern information in Chapter 14 is also very helpful when you solve these puzzles. In most of these puzzles, I've kept the answer list to words that are in general use — some words in the Hard puzzles are unusual, but they're not foreign or archaic terms.

For an added challenge, use only words in a particular dictionary (the Scrabble dictionary is a great example). And if you want to increase the number of possible words, add two-letter words to the game.

Puzzle 224: Mix-Up 3 x 3

Difficulty Level: Easy

See how many words you can find by moving in any direction from one letter to another without repeats. See whether you can discover the one nine-letter word in the grid, as well as more than 50 other shorter words!

E	A	H
N	L	P
S	T	E

Puzzle 225: Mix-Up 3 x 3

Difficulty Level: Easy

See whether you can discover the one nine-letter word in the grid, as well as more than 43 other shorter words!

E	G	D
W	E	N
L	O	K

Puzzle 226: Muddled Letters

Difficulty Level: Easy

See how many words you can make with these five sets of seven letters. You can use each letter only once in each word.

1. L D N A G R A (at least 26 words, including one 7-letter word)
2. T I E E H I N (at least 18 words)
3. E I R T A O N (at least 90 words, including five 6-letter words)
4. R W O U T N Y (at least 38 words)
5. M I L J E C A (at least 34 words)

Puzzle 227: Muddled Letters

Difficulty Level: Easy

See how many words you can make with these sets of letters. You can use each letter only once in each word.

1. F U A M O T T (at least 22 words)
2. S C H A A K W (at least 26 words, including one 7-letter word)
3. A O I V E T L (at least 60 words, including one 7-letter word)
4. K E Q I R U A (at least 22 words)
5. D A B A Y E H (at least 26 words)

Puzzle 228: In the Ballpark

Difficulty Level: Easy

Rearrange these words to uncover baseball-themed anagrams. I give you the number of letters in each word of the answer after each anagram.

1. RIP THEN ITCH (5, 6)
2. CHAOS TUBE (5, 4)
3. FED FILLET (4, 5)
4. NAIL READY (4, 5)
5. HOUR MEN (4, 3)

Puzzle 229: Goo Goo Ga Ga

Difficulty Level: Easy

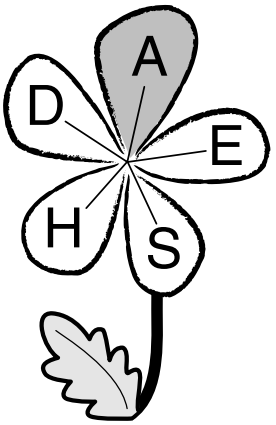
Rearrange these words to uncover some babyish words. I give you the number of letters in each word of the answer after each anagram.

1. ANTE IMP (3, 4)
2. DARE NOT HOP (10)
3. NICE SIGH, GRANDPA! (8, 7)
4. SEEK STEW, SIS (5, 6)
5. RISKY FIG SCENT (6, 7)

Puzzle 230: Daisy Words

Difficulty Level: Easy

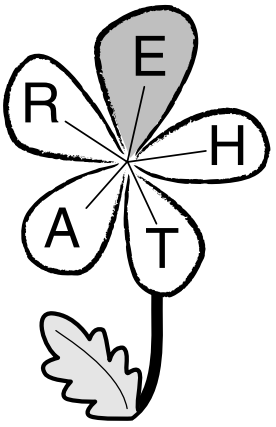
Find as many words as you can by using these five letters. You can skip from any letter to another in any order, but you can't use the letter on any petal more than once in a word. You must use the letter in the shaded petal in each word. Two five-letter words are hidden here; see whether you can find them. Top marks if you can find 11 words!



Puzzle 231: Daisy Words

Difficulty Level: Easy

Find as many words as you can by using these five letters. Three words use all the letters; see whether you can find them! Bonus points if you can find 19 words. ***Remember:*** The letter *E* must be in every word.



Puzzle 232: Mix-Up 3 x 3

Difficulty Level: Easy

See how many words you can find by moving in any direction from one letter to another without repeats. See whether you can discover the one nine-letter word in the grid, as well as more than 20 other shorter words!

R	I	H
L	W	O
P	O	L

Puzzle 233: Mix-Up 4 x 4

Difficulty Level: Medium

Can you discover the two seven-letter words in the grid, as well as more than 120 other shorter words?

S	D	M	N
U	O	A	T
E	Y	L	E
E	S	O	T

Puzzle 234: Mix-Up 4 x 4

Difficulty Level: Medium

Look for the two five-letter words in the grid, as well as more than 40 other shorter words!

O	Y	I	E
V	O	Z	T
O	E	F	A
T	N	U	B

Puzzle 235: Muddled Letters

Difficulty Level: Medium

See how many words you can make with these sets of letters. You can use each letter only once in each word.

1. Q E U S I D P (at least 39 words)
2. J A P M D O E (at least 35 words)
3. G L E N D U T (at least 46 words)
4. V N C E E I O (at least 26 words)
5. Z A M T F H E (at least 35 words)

Puzzle 236: Muddled Letters

Difficulty Level: Medium

See how many words you can make with these sets of letters. Each set contains one seven-letter word.

1. A I R I G O M (at least 20 words)
2. B H I T M E L (at least 34 words)
3. E T E K S L T (at least 31 words)
4. R A F O C Y T (at least 61 words)
5. D R A K W W A (at least 11 words)

Puzzle 237: Digging in the Garden

Difficulty Level: Medium

Rearrange these words to uncover where they came from. I give you the number of letters in each word of the answer after each anagram.

1. TRUE WAFER TEA (5, 7)
2. RAW CELERY SPICE (6, 8)
3. SEPAL STORE (4, 6)
4. STATEROOM PIE (4, 8)
5. OPPOSE MATCH (7, 4)

Puzzle 238: Dish It Up!

Difficulty Level: Medium

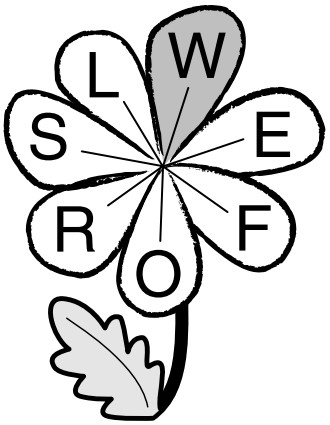
Rearrange these words to serve up some local dishes.

1. LED COW MARCH (4, 7)
2. PALE PIPE (5, 3)
3. POSH MUG BRIM (6, 5)
4. PINE OUT (7)
5. TRY FLEA SWAT AFT (9, 5)

Puzzle 239: Daisy Words

Difficulty Level: Medium

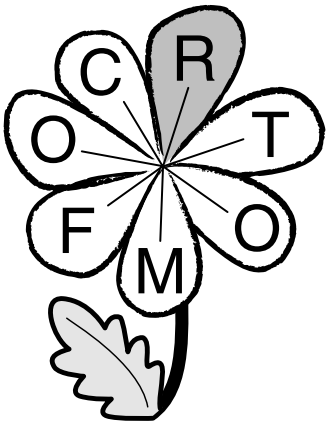
Find as many words as you can by using these seven letters. See whether you can find the two seven-letter words. This set includes 26 common words, but if you want to make the puzzle a bit harder, look for more archaic words (and check them against a dictionary).



Puzzle 240: Daisy Words

Difficulty Level: Medium

See whether you can find the one seven-letter word. This set includes 26 common words; I include 20 words in the answers for this set (in Chapter 13), but you can find more unusual words if you want to look further.



Puzzle 241: Mix-Up 4 x 4

Difficulty Level: Medium

See how many words you can find by moving in any direction from one letter to another without repeats. See whether you can discover the five six-letter words in the grid, the two seven-letter words, and more than 80 other shorter words!

E	F	U	T
T	E	A	E
N	G	O	X
S	A	R	M

Puzzle 242: Mix-Up 4 x 4

Difficulty Level: Hard

See how many words you can find by moving in any direction from one letter to another without repeats. Can you find the one seven-letter word in the grid, as well as more than 60 other shorter words?

O	S	B	L
E	A	L	A
Y	N	E	Z
R	I	J	O

Puzzle 243: Mix-Up 4 x 4

Difficulty Level: Hard

See whether you can discover the one nine-letter word in the grid, as well as more than 90 other shorter words!

E	N	O	P
I	S	W	I
R	O	C	H
S	K	L	Y

Puzzle 244: Muddled Letters

Difficulty Level: Hard

See how many words you can make with these sets of letters. You can use each letter only once in each word.

1. A D R G O O U (at least 31 words)
2. R E H P P G Y (at least 18 words)
3. F O I D O L A (at least 28 words)
4. V T P E B N T (at least 12 words)
5. I H E N F T X (at least 29 words)

Puzzle 245: Muddled Letters

Difficulty Level: Hard

See how many words you can make with these sets of letters. You can use each letter only once in each word.

1. E T L I D U Q (at least 38 words, including one 7 letter word)
2. S K E N Y B C (at least 17 words)
3. M A Z U R N E (at least 37 words)
4. J O I D G R B (at least 29 words)
5. A T P T W C H (at least 27 words)

Puzzle 246: Travel the World

Difficulty Level: Hard

Rearrange these words to discover ten capital cities from around the world. I give you the number of letters in each word of the answer after each anagram.

1. EARN LAVA DOLLAR (7, 2, 5)
2. EVIDENT MOO (10)
3. GOT NEW OGRE (10)
4. CHERUB SAT (9)
5. SERIOUS BEAN (6, 5)
6. HENCE, NO GAP (10)
7. LENTIL GOWN (10)
8. MUGS IDAHO (6)
9. SHAKE TNT! (8)
10. PORCUPINE ART (4-2-6)

Puzzle 247: Confused Composers

Difficulty Level: Hard

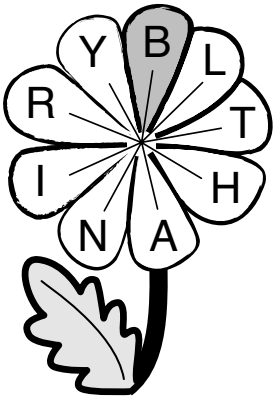
Unscramble these anagrams to find 10 composers' names — both first and last. I give you the number of letters in each word of the answer after each anagram.

1. KNIT IVORY GRASS (4, 10)
2. SILVER CHASE (7, 4)
3. SCRUB HERTZ FAN (5, 8)
4. USE BUDDY SCALE (6, 7)
5. CHARTS USSR RAID (7, 7)
6. DARK VAN NOTION (7, 6)
7. REWARD GLADE (6, 5)
8. NO PANIC LOGICIAN (7, 8)
9. AVOID TAN VIOLIN (7, 7)
10. IGNORE SHREW EGG (6, 8)

Puzzle 248: Daisy Words

Difficulty Level: Hard

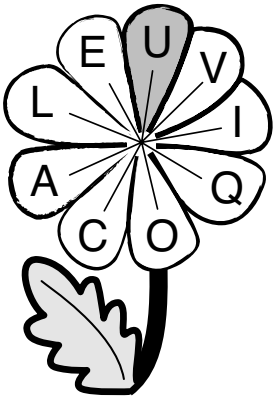
Find as many words as you can by using these nine letters. See whether you can find the one nine-letter word. You can find at least 38 words in this set, some of which are quite tricky. Good luck!



Puzzle 249: Daisy Words

Difficulty Level: Hard

Find as many words as you can by using these nine letters. See whether you can find the one nine-letter word. You can find at least 22 words in this set, some of which are quite tricky. Good luck!



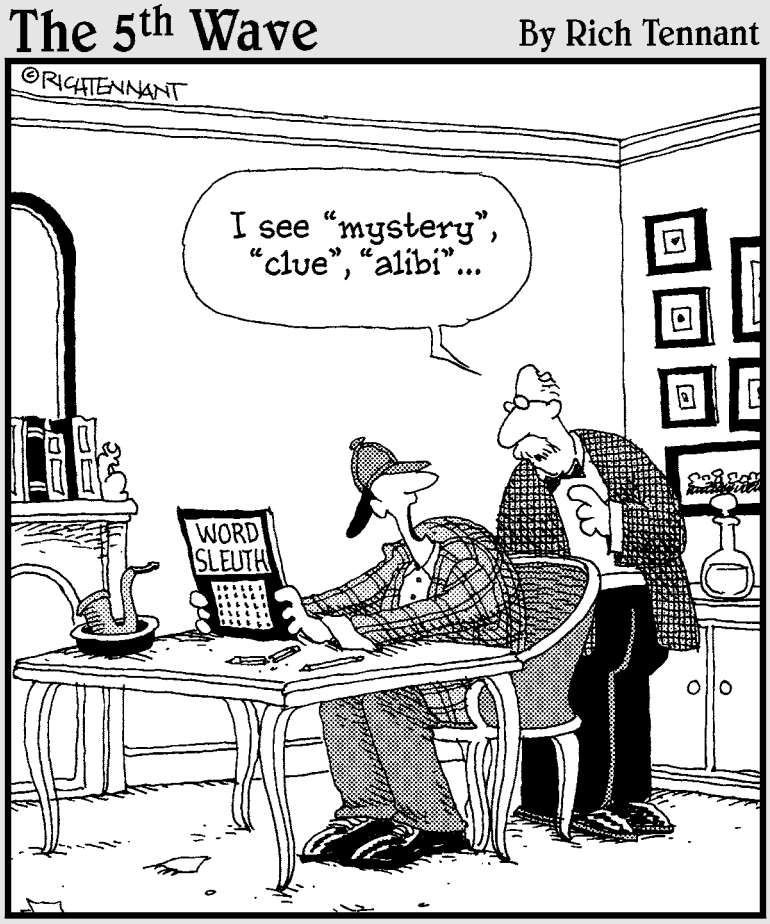
Puzzle 250: Mix-Up 5 x 5

Difficulty Level: Hard

See how many words you can find by moving in any direction from one letter to another without repeats. Can you discover the two eight-letter words in the grid, as well as more than 100 other shorter words?

R	E	X	A	K
E	A	U	F	C
B	I	M	D	A
Y	U	H	E	B
N	S	O	L	V

Part IV
Hints and Answers



"If you don't mind, I'm quite able to find the words on my own, Watson!"

In this part . . .

I'm revealing all — yes, I'm giving you the hints and answers! If you're stuck on a puzzle, try the hints in Chapter 12 first. The kinds of hints vary — the starting point of a particular word in the grid, the number of words that start in a particular row or column of the grid, or the answer to a quiz question or other part of a complex puzzle — but each and every puzzle has its own (hopefully) helpful tidbit.

The answers are in Chapter 13, with every word shown in every grid, if you need them. I also give you the answers to the extra puzzle parts, such as extra words, hidden messages, quiz answers, unscrambled words, and so on.

Chapter 12

Helpful Hints to Keep You Going

In This Chapter

- Using a coordinate system to navigate the grid
- Refusing to admit defeat (otherwise known as getting a hint)

Each puzzle in this book has a hint or two that you can easily access here without spoiling the rest of the puzzle by having to check the answer in Chapter 13. These hints vary in form: revealing a few words in the grid, answering quiz questions, unscrambling jumbled words, and so on.

Understanding the Grid Coordinate System

I use coordinates to indicate where a word starts in the letter grid. Think about the grid coordinate system you use to pinpoint and direct your deadly attacks (or, in my case, frequent misses) when playing Battleships. Here's what you need to know about the coordinate system:

- The word in ALL CAPITALS is the word to search for in the letter grid.
- The first coordinate is the *x coordinate* and runs left to right along the top of the grid. In this book, I label each column on this axis with a capital letter, starting with *A*.
- The second coordinate is the *y coordinate* and runs from the top to bottom of the grid. Here I number each row consecutively, beginning with *1* (a good place to start, no?).

The grid in Figure 12-1 shows 12 columns, labeled A to L, and 9 numbered rows. You can find the word BASIL starting at position (A, 2) — the point where column A and row 2 intersect. So if you get a hint reading "PETAL starts at (H, 4)," you can expect to find a *P* at the intersection of column H and row 4. You can then check the eight squares around the *P* until you find the *E,* the *T,* and so on.

	A	B	C	D	E	F	G	H	I	J	K	L
1	C	K	C	N	E	C	N	I	R	P	D	O
2	**B**	A	R	H	A	D	E	A	R	H	L	Y
3	D	A	E	A	O	B	N	N	I	R	E	H
4	R	C	S	D	A	M	E	**P**	A	D	D	I
5	A	E	I	I	O	K	E	K	U	T	S	R
6	C	R	R	G	L	T	R	A	Z	R	O	N
7	O	I	U	Q	A	S	S	A	N	A	S	N
8	R	F	R	L	K	M	S	S	D	G	F	H
9	E	F	S	A	E	A	O	K	R	F	P	O

Figure 12-1: Using the coordinate grid to locate the starting letter for a word.

Chapter 1 Hint

Example puzzle: The second word in the first proverb is HARD.

Chapter 3 Hints

Puzzle 1: Six words run diagonally.

Puzzle 2: BEACH starts at (I, 7).

Puzzle 3: Three words run diagonally.

Puzzle 4: ANKLET starts at (H, 7).

Puzzle 5: Four words run vertically.

Puzzle 6: Nine letters are used twice.

Puzzle 7: PARROT starts at (C, 13).

Puzzle 8: Six words run diagonally.

Puzzle 9: FRASIER starts at (K, 7).

Puzzle 10: CANDLELIGHT starts at (L, 11).

Puzzle 11: Seven words run vertically.

Puzzle 12: PUT ON A SWEATER starts at (P, 14).

Puzzle 13: Nine words run diagonally.

Puzzle 14: EYE OF THE TIGER starts at (N, 4).

Puzzle 15: Only two words run vertically.

Puzzle 16: Five words run horizontally.

Puzzle 17: BOSTON starts at (C, 9).

Puzzle 18: OKAPI starts at (J, 6).

Puzzle 19: TEMPERATURE starts at (K, 16).

Puzzle 20: BBQ is near the middle of the puzzle.

Puzzle 21: Two words start at (J, 12).

Puzzle 22: One word starts at (F, 13).

Puzzle 23: Two words start at (L, 12).

Puzzle 24: One word starts at (P, 15).

Puzzle 25: Three words start in row 20.

Puzzle 26: Four words start in column R.

Puzzle 27: Four words start in row 8.

Chapter 4 Hints

Puzzle 28: VAN HOUTEN starts at (M, 4).

Puzzle 29: Three words start in column I.

Puzzle 30: CHANGE starts at (M, 9).

Puzzle 31: WASHES starts at (I, 7).

Puzzle 32: Five words start in row 17.

Puzzle 33: Nine words run horizontally.

Puzzle 34: Five words start in column H.

Puzzle 35: Three words start in row 7.

Puzzle 36: Three words start in column E.

Puzzle 37: Two words start in column M.

Puzzle 38: Six words run horizontally.

Puzzle 39: Two words start in row 11.

Puzzle 40: The extra word is RESEARCH.

Puzzle 41: PLUMP and LUCKY are two of the extra words.

Chapter 5 Hints

Puzzle 42: Seven words start in column F.

Puzzle 43: Six words start in column G.

Puzzle 44: FENCES starts at (G, 6).

Puzzle 45: Five words start in column K.

Puzzle 46: LOWELL starts at (G, 8).

Puzzle 47: Four words run diagonally.

Puzzle 48: Three words start in column D.

Puzzle 49: Two words start in row 3.

Puzzle 50: GEOLOGY starts at (K, 14).

Puzzle 51: Seven words run vertically.

Puzzle 52: Four words start in column O.

Puzzle 53: Five words start in row 10.

Puzzle 54: Three words run vertically.

Puzzle 55: Three words start in row 16.

Puzzle 56: Seven words start in column P.

Puzzle 57: OWL starts at (F, 11).

Puzzle 58: Seven words start in column I.

Puzzle 59: Four words start in column J.

Puzzle 60: Four words start in row 3.

Puzzle 61: Five words start in row 5.

Puzzle 62: MONEY starts at (P, 12).

Puzzle 63: Four words start in row 7.

Puzzle 64: Two words start in row 10.

Puzzle 65: Two words start in row 11.

Puzzle 66: Two words in the answer are UGLIER and PLAYS.

Puzzle 67: Seven words start in row 15.

Puzzle 68: Two words in the answer are LUXURY and NOT.

Puzzle 69: Five words start in row 5.

Puzzle 70: NAP starts at (R, 18).

Puzzle 71: The extra word is PAUSE.

Puzzle 72: BUG starts at (L, 7).

Puzzle 73: No words start in row 18 or 20.

Puzzle 74: Four words end in row 14.

Chapter 6 Hints

Puzzle 75: VANILLA starts at (G, 6).

Puzzle 76: Three words start in row 8.

Puzzle 77: Four words start in row 12.

Puzzle 78: ELF starts at (C, 7).

Puzzle 79: Four words start in column F.

Puzzle 80: PEA starts at (D, 12).

Puzzle 81: Two words start in row 4.

Puzzle 82: Five words start in column G.

Puzzle 83: ORB starts at (H, 14).

Puzzle 84: IVY starts at (O, 8).

Puzzle 85: Three words start in row 9.

Puzzle 86: One word starts in column J.

Puzzle 87: Five words start in column G.

Puzzle 88: One word starts in row 10.

Puzzle 89: TWO starts at (N, 11).

Puzzle 90: Six words start in row 15.

Puzzle 91: Nine words start in column G.

Puzzle 92: TAN starts at (D, 13).

Puzzle 93: One word starts in row 9.

Puzzle 94: Seven words start in row 3.

Puzzle 95: IMP starts at (I, 8).

Puzzle 96: Five words start in column I.

Puzzle 97: Three words start in row 12.

Puzzle 98: Three words start in column S.

Puzzle 99: Three words start in row 10.

Puzzle 100: Three words start in both column K and row 8.

Puzzle 101: Six words start in column H.

Puzzle 102: Four words start in row 12.

Puzzle 103: HIP starts at (O, 20).

Puzzle 104: Five words start in row 15.

Puzzle 105: One word starts in column G.

Puzzle 106: Five words start in row 13.

Puzzle 107: Six words start in row 9.

Chapter 7 Hints

Puzzle 108: The answers start with the letters *A, B, B, G, J, S, T, T, T,* and *T.*

Puzzle 109: The answers start with the letters *B, C, D, F, G, K, L, M, P, P, R, R,* and *T.*

Puzzle 110: One of the colors is VERMILION.

Puzzle 111: The longest entry is CROCHET HOOK.

Puzzle 112: The first word is AQUIFER.

Puzzle 113: The longest word is WASHINGTON.

Puzzle 114: The first three words start with *A,* and the last four words start with *T.*

Puzzle 115: Five words start with *P.*

Puzzle 116: Three names start with *M,* and five words start in row 6.

Puzzle 117: Four names start with *C.*

Puzzle 118: The longest entry is GIVE SOMEONE A LIFT, and three words start in column J.

Puzzle 119: Ten words run horizontally.

Puzzle 120: PIRATES is one of the words, and three words start in column G.

Puzzle 121: Five words start with *C,* and four start with *M.*

Puzzle 122: Two words start in row 9, and seven words start with *M.*

Puzzle 123: Five words start with *D,* and three start with *G.*

Puzzle 124: One word starts in row 4.

Puzzle 125: RED FLAG and MR MISTER are in the grid.

Puzzle 126: KENDALL and TIFFANY are in the grid.

Puzzle 127: LAMBORGHINI is in the grid, and four words start in column N.

Puzzle 128: The fourth word is BAJA CALIFORNIA, and seven words start with *S.*

Puzzle 129: Four names start in row 3.

Puzzle 130: Five words start with *B,* and PODCAST is in the grid.

Puzzle 131: ANTWERP and MANCHESTER are in the grid, and five words start in column H.

Puzzle 132: Seven words start with *B,* and six start with *S.*

Puzzle 133: FLU-FLUS and POPINJAY are in the grid.

Puzzle 134: Four words start in row 15.

Puzzle 135: Three words start in row 16, and four words start with *M.*

Puzzle 136: QUEEN DANIO and KRIBENSIS are in the grid.

Chapter 8 Hints

Puzzle 137: The answer to number 7 is GREEBO.

Puzzle 138: The answer to number 15 is TWYLA THARP.

Puzzle 139: The answers to numbers 5, 6, and 7 all start with *C.*

Puzzle 140: The answer to number 17 is XIJIANG, and two words start in row 7.

Puzzle 141: The answers to numbers 2 through 5 all start with *C,* and two words start in column J.

Puzzle 142: The answer to number 2 is AUREOLIN, and four words start with *T.*

Puzzle 143: The answer to number 11 is KELPIE, and three words start with *M.*

Puzzle 144: The answer to number 18 is TORONTO, and two words start in row 4.

Puzzle 145: The answer to number 7 is CERN, and four words start with *P.*

Puzzle 146: The answer to number 3 is ALCACHOFA, and three words start in row 17.

Puzzle 147: The answer to number 8 is DERRIS DUST, and three words start with *H.*

Puzzle 148: The answer to number 5 is BAYERISCHE, and four words start in row 13.

Puzzle 149: The answer to number 10 is HRYVNIA, and four words start in column Q.

Puzzle 150: The answer to number 19 is NANNY OGG, and five words start with *J.*

Puzzle 151: The answer to number 4 is CETACEANS, and three words start in row 9.

Puzzle 152: The answer to number 10 is EXISTENZ, and the answer to number 13 is HASKIN.

Puzzle 153: The answer to number 24 is MAWSON, and seven words start with *C*.

Puzzle 154: The answer to number 12 is ECO-PARTY, and the last four words start with *W*.

Puzzle 155: The answer to number 6 is CHRÉTIEN, and four words start in row 17.

Puzzle 156: The answer to number 23 is MOINEAU, and five words start with *B*.

Puzzle 157: The answer to number 20 is HOVHANESS, and five words start in row 20.

Puzzle 158: The answer to number 28 is TOURTIÈR, and number 9 is a bird.

Puzzle 159: Four words start and four words end in row 12, and five words start with *K*.

Puzzle 160: Four words start in row 11, and CUMULUS HUMILIS is in the grid.

Puzzle 161: Four words start in row 17, and six words start with *P*.

Puzzle 162: The answer to number 23 is AUSGEFLIPPT, and four words start in row 19.

Puzzle 163: The answer to number 13 is EL DIABLO, and four words start with *A*.

Puzzle 164: Number 16 (PERICLES) doesn't appear in the grid, and three words start in column D.

Puzzle 165: Six words start with *G,* and VACHERIN is the extra word.

Puzzle 166: Number 15 is CUCULIFORMES, and number 28 is VITALES.

Chapter 9 Hints

Puzzle 167: The color starting with *C* is CYAN.

Puzzle 168: Four of the animals are big cats.

Puzzle 169: Two of the trees have WOOD in their names.

Puzzle 170: Three words start in row 4.

Puzzle 171: Three of the flowers start with *L.*

Puzzle 172: LACROSSE and RUBGY are in the grid.

Puzzle 173: WIRELESS and GIGABYTE are in the grid.

Puzzle 174: Three words start with *C,* and the last two words start with *W.*

Puzzle 175: CORNISH REX and SOMALI are in the grid.

Puzzle 176: Three names start with *G,* and two start with *I.*

Puzzle 177: JASPER and ONYX are in the grid.

Puzzle 178: SUFISM and TAOISM are the last two words.

Puzzle 179: Three words start in column F.

Puzzle 180: The 2nd, 14th, 21st, 22nd, and 26th names are Canadian.

Puzzle 181: Three words start in row 8, and the last word starts with *Z.*

Puzzle 182: PUEO and BUNTING are in the grid.

Puzzle 183: MADNESS and NEW ORDER appear in the grid.

Puzzle 184: EMBOSSING and MILLINERY are in the grid.

Puzzle 185: Twelve of the words end with *E,* and three words start in row 10.

Puzzle 186: The starting letters are *A, A, B, C, F, F, F, G, H, K, L, M, P, S, S, S, T, T, V,* and *W.*

Puzzle 187: Six names start with *M,* and four start with *B.*

Puzzle 188: The starting letters are *A, A, B, B, B, C, C, C, C, F, G, H, H, I, I, L, L, M, N, N, O, P, P, P, S, S, S, S, T, X,* and *Z.*

Puzzle 189: Four words start with *H,* five start with *K,* and four start with *M.*

Puzzle 190: Three words start in row 6, and three start in column L.

Puzzle 191: FAURÉ is in the grid, and five names start with *S.*

Puzzle 192: GYPSUM and SCHIST are in the grid, and three words start in row 17.

Puzzle 193: DAWSON and VOLTA are in the grid, and two names start in column F.

Puzzle 194: QUATRAIN and QUEUE are in the grid, and eight words run vertically.

Puzzle 195: SEMELE and MANON are in the grid, and no words start in rows 8, 10, or 15.

Chapter 10 Hints

Puzzle 196: TOMATO starts at (E, 3).

Puzzle 197: FROZEN TOES starts at (C, 6).

Puzzle 198: AEGEAN ends at (F, 3).

Puzzle 199: SNICKERDOODLE starts at (E, 6).

Puzzle 200: FIVE starts at (C, 4).

Puzzle 201: SAIL starts at (I, 9).

Puzzle 202: Three words start in row 6.

Puzzle 203: One word starts in row 7.

Puzzle 204: GIFTED ends at (H, 8).

Puzzle 205: Five words start in column E.

Puzzle 206: No words start in row 9.

Puzzle 207: SERRANO starts at (I, 3).

Puzzle 208: Four words start in row 6.

Puzzle 209: Two words end in column H.

Puzzle 210: Five words start in column C.

Puzzle 211: One word starts in column G.

Puzzle 212: No words start in row 8.

Puzzle 213: FLUFFY starts at (E, 10).

Puzzle 214: OKINAWA ends at (B, 2).

Puzzle 215: Four words start in row 10.

Puzzle 216: Two words start in row 6.

Puzzle 217: DALZIEL ends at (K, 6).

Puzzle 218: The two hidden words both start with *F*.

Puzzle 219: EPOCH starts at (J, 11).

Puzzle 220: SACRUM ends at (C, 10).

Puzzle 221: CHIPMUNK starts at (F, 8).

Puzzle 222: Two names start in column B.

Puzzle 223: SBITEN is the extra word.

Chapter 11 Hints

Puzzle 224: The nine-letter word starts with *E* and ends with *S*.

Puzzle 225: Seven words start with *K,* and four start with *O*.

Puzzle 226:

1. Eleven words start with *G*.
2. More than half the words start with *T*.
3. Twenty words start with *R*.
4. Five words start with *W*.
5. Two words start with *J*.

Puzzle 227:

1. Eleven words start with *T*.
2. Six words start with *C*.
3. Twenty-four words start with *V*.
4. Six words start with *Q*.
5. Ten words start with *B*.

Puzzle 228: The five starting letters are *P, T, L, R,* and *H.*

Puzzle 229: The five starting letters are *N, P, C, S,* and *S.*

Puzzle 230: One word starts with *D,* and four start with *S.*

Puzzle 231: Seven words start with *H,* and four start with *E.*

Puzzle 232: The nine-letter word starts with *W,* and ends with *L.*

Puzzle 233: Both seven-letter words start with *M.*

Puzzle 234: Ten words start with *F.*

Puzzle 235:

1. Four words start with *E.*
2. Eleven words start with *M.*
3. Twelve words start with *G.*
4. Six words start with *V.*
5. Seven words start with *F.*

Puzzle 236:

1. The seven-letter word starts with *O.*
2. Six words start with *B.*
3. The seven-letter word starts with *K.*
4. Eleven words start with *T.*
5. The seven-letter word ends with *D.*

Puzzle 237: The five starting letters are *W, C, R, R,* and *C.*

Puzzle 238: The five starting letters are *C, A, S, P,* and *S.*

Puzzle 239: Both seven-letter words start with *F.*

Puzzle 240: The seven-letter word starts with *C.*

Puzzle 241: The five six-letter words start with *G, M, N, O,* and *O.*

Puzzle 242: The seven-letter word starts with *B.*

Puzzle 243: Sixteen words start with *C.*

Puzzle 244:

1. Seven words start with *D*.
2. Seven words start with *P*.
3. Four words start with *O*.
4. No words are longer than four letters.
5. Three words have five letters.

Puzzle 245:

1. Three words start with *E*.
2. Three words start with *K*.
3. Ten words start with *R*.
4. All the words are either three or four letters long.
5. Two words have 5 letters.

Puzzle 246: The starting letters are (from 1–10): *A, M, G, B, B, C, W, M, T,* and *P*.

Puzzle 247: The ten *surnames* start with: *S, I, S, D, S, D, E, P, V,* and *G*.

Puzzle 248: Twenty-five of the words start with *B*.

Puzzle 249: The nine-letter word starts with *E*.

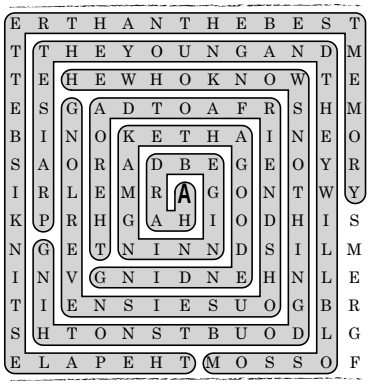
Puzzle 250: The eight-letter words start with *A* and *U*.

Chapter 13

The Answers You Seek

Figure 1-1

Proverbs within a Maze



A hard beginning maketh a good ending.
The road to a friend's house is never long.
He who knows nothing, doubts nothing.
Praise the young and they will blossom.
The palest ink is better than the best memory.

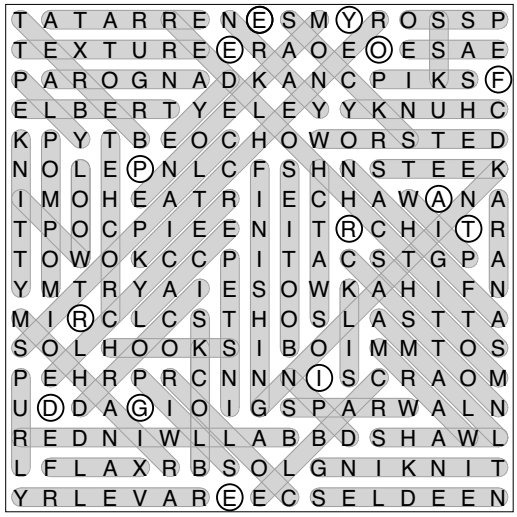
Hidden answer: THE SIXTH SHEIKH'S SIXTH SHEEP IS SICK.

Puzzle 60

Hidden answer IN MEXICO WE HAVE A WORD FOR SUSHI: BAIT.

Puzzle 61

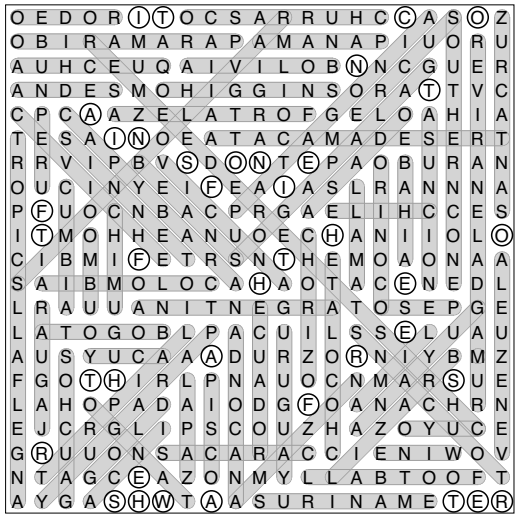


Hidden answer: EYE OF PARTRIDGE

Puzzle 62

Hidden answer: “STAIRWAY TO HEAVEN” IS THE MOST REQUESTED SONG IN THE USA.

Puzzle 63



Hidden answer: IT CONTAINS ONE-FIFTH OF THE EARTH’S FRESH WATER.

Puzzle 64

Hidden answer: HEY, IS THE BAR TENDER HERE?

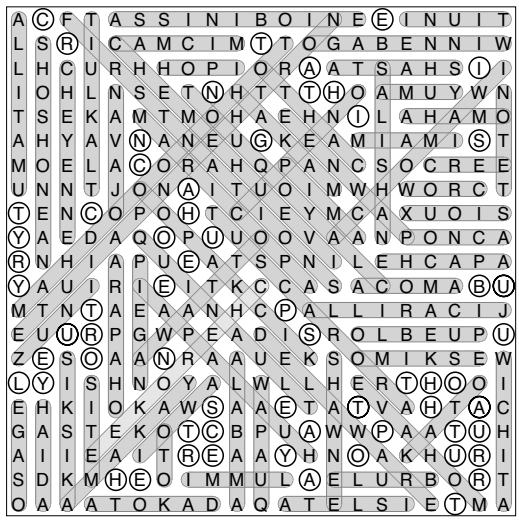
Puzzle 65

Hidden answer: OUR DOG CHASES PEOPLE ON A BIKE. WE'VE HAD TO TAKE IT OFF HIM.

Puzzle 66

Hidden answer: THE UGLIER A MAN'S LEGS ARE, THE BETTER HE PLAYS GOLF — IT'S ALMOST A LAW.

Puzzle 67

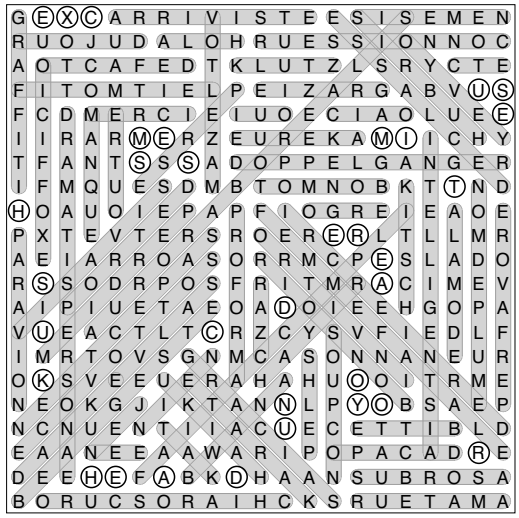


Hidden answer: CERTAIN THINGS CATCH YOUR EYE, BUT PURSUE ONLY THOSE THAT CAPTURE YOUR HEART.

Puzzle 68

Hidden answer: LUXURY MUST BE COMFORTABLE; OTHERWISE, IT IS NOT LUXURY.

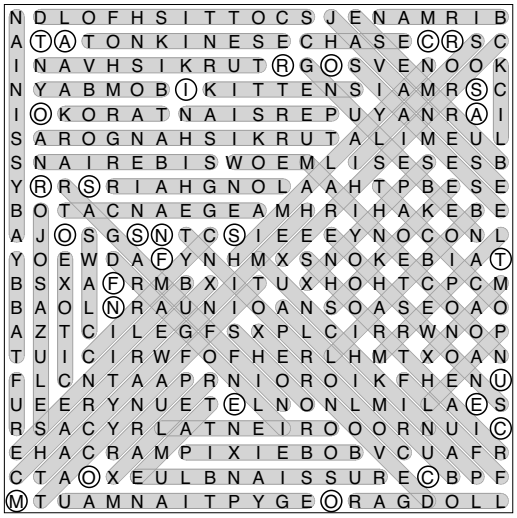
Puzzle 69



The extra word is SALUT.

Hidden answer: EXCUSE ME, MISS, THERE'S A DUCK ON YOUR HEAD!

Puzzle 70



Hidden answer: CATS ARE CONNOISSEURS OF COMFORT.

Puzzle 71

The extra word is PAUSE.

Hidden answer: ACTIONS LIE LOUDER THAN WORDS.

ALE	CLAM	JAIL	LICE	MALE	
CALM	CLIME	JAM	LIE	MALICE	

Puzzle 227

Number 1:

AFT	FOAM	MOAT	OUT	TAU	TOUT
ATOM	MAT	MUTT	TAM	TAUT	TUFT
AUTO	MATT	OAT	TAO	TOFU	TUM
FAT	MOA	OFT	TAT	TOT	TUT

Number 2:

The 7-letter word is HACKSAW

AHA	CASH	CHAW	HACKSAW	SAC	SHACK	WHACK
ASH	CASK	CHAWS	HAS	SACK	SKA	WHACKS
ASK	CAW	HACK	HAWK	SAW	WAS	
AWASH	CAWS	HACKS	HAWKS	SCHWA	WASH	

Number 3:

The 7-letter word is VIOLATE

AIL	LEI	OIL	TIL	VEIL	VIOLET
ALE	LET	OLIVE	TILE	VET	VITA
ALIVE	LIE	OVA	TOE	VETO	VITAE
ALOE	LIT	OVAL	TOIL	VIA	VITAL
ALTO	LITE	TAIL	TOILE	VIAL	VITE
ATE	LIVE	TALE	TOLE	VIE	VOILA
EAT	LOT	TAO	VALE	VILE	VOILE
EVIL	LOVAT	TEA	VALET	VIOL	VOLE
IOTA	LOVE	TEAL	VAT	VIOLA	VOLT
LATE	OAT	TIE	VEAL	VIOLATE	VOTE

Number 4:

AIR	EAR	KIR	QUARK	RAKI	UKE
ARE	ERA	QUA	QUIRE	RAKU	UREA
ARK	IRE	QUAKE	QUIRK	RIA	
AUK	IRK	QUAKER	RAKE	RUE	

Number 5:

ABED	AYE	BAH	BEADY	DAY	HAY	YEA
AHA	BAA	BAY	BED	DEB	HEAD	YEAH
AHEAD	BAD	BAYED	BYE	DYE	HEADY	
AYAH	BADE	BEAD	DAB	HAD	HEY	

Puzzle 228

1. PINCH HITTER
2. TOUCH BASE
3. LEFT FIELD
4. RAIN DELAY
5. HOME RUN

Puzzle 229

1. NAP TIME
2. PARENTHOOD
3. CHANGING DIAPERS
4. SWEET KISSES
5. STICKY FINGERS

Puzzle 230

The two 5 letter words are HEADS and SHADE

ADS	HAS	SEA
ASH	HEAD	SHADE
DASH	HEADS	SHEA
HAD	SAD	

Puzzle 231

The three 5 letter words are EARTH, HATER, and HEART

ARE	EAT	HATER	HER	TEA
ATE	ERA	HEAR	RATE	TEAR
EAR	HARE	HEART	RHEA	THE
EARTH	HATE	HEAT	TARE	

Puzzle 232

The 9-letter word is WHIRLPOOL

HOOP	LOW	POLO	WHIRL	WOO
HOW	OIL	POOH	WHIRLPOOL	WOOL
HOWL	OWL	POOL	WHO	
LOOP	PLOW	POW	WHOOP	
LOP	POLIO	WHIR		

Puzzle 233

The two 7-letter words are MALTOSE and MANTELS

ADO	DOE	LEAD	MAT	SLAT	TAM
ADS	DOES	LEADS	MATE	SLATE	TAN
ALE	DOLE	LEAN	MAY	SLAY	TEA
ALOE	DOLT	LEANT	MAYO	SLOE	TEAL
ALOES	DOS	LET	MOA	SLOT	TEALS
ALOUD	DUE	LOAD	MOAS	SLY	TEAM
ALSO	DUES	LOADS	MOAN	SOD	TEAT
ALTO	DUO	LOAM	MOAT	SODA	TOE
ALTOS	DUOS	LOAN	MOD	SOL	TOLE
ANT	EAT	LOSE	MODAL	SOLE	TOY
ANTE	ELAN	LOT	MODUS	SOLO	TOYS
ATE	ELSE	LOUD	MOLE	SOLOS	YAM
AYE	EYE	LYE	MOLT	SOMA	YEOMAN
AYES	EYES	MAD	NAE	SOU	YES
DALE	LAD	MALE	NAY	SOY	YOD
DAM	LADS	MALT	NAYS	SOYA	YOU
DAMN	LAM	MALTOSE	OAT	SUE	
DAN	LATE	MAN	OLEO	SUES	
DATE	LAY	MANTEL	SEE	TAD	
DAY	LAYS	MANTELS	SLAM	TADS	
DAYS	LEA	MANTLE	SLANT	TALE	

Puzzle 234

The two 5-letter words are AFOOT and TAUNT

AFOOT	EON	FEZ	OFT	TAUNT	VENT
AFT	ETA	FOE	ONE	TEN	VET
ATE	FAB	FOOT	OOZE	TIE	VETO
AUNT	FAT	FUN	OOZY	TOE	VOTE
BAT	FATE	NET	OVEN	TON	ZETA
BUN	FAUN	NOT	TAB	TONE	ZOO
BUNT	FAZE	NOTE	TABU	TOO	
EFT	FEN	NUB	TAU	UNTO	

Puzzle 235

Number 1:

DIE	DUPE	PIE	QUID	SPIED	UPS
DIES	DUPES	PIED	QUIDS	SPUD	UPSIDE
DIP	EQUID	PIES	QUIP	SQUID	USE
DIPS	EQUIDS	PIQUE	QUIPS	SUE	USED
DIS	EQUIP	PIQUED	SIDE	SUED	
DUE	EQUIPS	PISE	SIP	SUP	
DUES	IDES	PSI	SPED	SUQ	

Number 2:

ADO	DAME	JADE	MADE	MODE	PEA
AMP	DAMP	JAM	MAP	MOP	POD
AMPED	DEMO	JAPE	MEAD	MOPE	POEM
APE	DOE	JAPED	MED	MOPED	POMADE
APED	DOME	JOE	MOA	ODE	POME
DAM	DOPE	MAD	MOD	PAD	

Number 3:

DEN	DUNG	GLUT	LEND	LUNGED	TUG
DENT	END	GLUTE	LENT	LUTE	TULE
DUE	GEL	GLUTEN	LET	NET	TUN
DUEL	GENT	GNU	LUG	NUDE	TUNE
DUET	GET	GUN	LUGE	NUDGE	TUNED
DUG	GLEN	GUT	LUNE	NUT	UTE
DUN	GLUE	LED	LUNG	TEN	
DUNE	GLUED	LEG	LUNGE	TEND	

Number 4:

COIN	COVEN	EVINCE	NEE	ONCE	VEIN	VINO
CON	EON	ICE	NICE	ONE	VICE	VOICE
CONE	EVE	ICON	NIECE	OVEN	VIE	
COVE	EVEN	ION	NOVICE	OVINE	VINE	

Number 5:

AFT	FAME	FEZ	HEAT	MAZE	TEA
AHEM	FAT	HAFT	HEFT	MEAT	TEAM
ATE	FATE	HAM	HEM	MET	THE
EAT	FAZE	HAT	MAT	META	THEM
EFT	FEAT	HATE	MATE	TAM	ZETA
ETA	FETA	HAZE	MATH	TAME	

Puzzle 236

Number 1:

The 7-letter word is ORIGAMI

AGO	AMIGO	GRAM	MAGI	MOA	RAG	RIM
AIM	ARM	GRIM	MAR	OAR	RAM	ROAM
AIR	GAR	MAG	MARG	ORIGAMI	RIG	

Number 2:

The 7-letter word is THIMBLE

BELT	ELHI	HILT	LIE	MELT	THIMBLE
BET	ELM	HIM	LIMB	MET	TIE
BILE	EMIT	HIT	LIME	MILE	TILE
BIT	HELM	ITEM	LITE	MITE	TIME
BITE	HEM	LEI	LITH	THE	
BLITHE	HIE	LET	LITHE	THEM	

Number 3:

The 7-letter word is KETTLES

EEL	KEEL	LEES	SETTLE	TEE
EELS	KEELS	LEST	SKEET	TEES
EKE	KETTLE	LET	SLEEK	TEST
EKES	KETTLES	LETS	SLEET	
ELK	LEE	SEE	STEEK	
ELKS	LEEK	SEEK	STEEL	
ELSE	LEEKS	SET	STET	

Number 4:

The 7-letter words is FACTORY *(And yes, I know you can find a rude word or two, but I'm not going to put them in!)*

ACT	CAR	CROFT	FOR	OAR	RAT	TOR
ACTOR	CART	CRY	FORAY	OAT	RAY	TORC
AFRO	CAT	FACT	FORT	OCA	ROC	TOY
AFT	CAY	FACTOR	FORTY	OFT	ROT	TRAY
ARC	COAT	FACTORY	FRAT	ORC	ROTA	TROY
ARCO	COT	FAR	FRAY	ORCA	TACO	TRY
ARF	COY	FARO	FRO	ORT	TAO	TYRO
ART	CRAFT	FAT	FRY	RACY	TAR	
ARTY	CRAFTY	FAY	OAF	RAFT	TARO	

Number 5:
The 7-letter word is AWKWARD

ARK	DARK	RAD	WAR
AWARD	DAW	RAW	WARD
AWKWARD	DRAW	WAD	

Puzzle 237

1. WATER FEATURE
2. CREEPY CRAWLIES
3. ROSE PETALS
4. RIPE TOMATOES
5. COMPOST HEAP

Puzzle 238

1. CLAM CHOWDER
2. APPLE PIE
3. SHRIMP GUMBO
4. POUTINE
5. SALTWATER TAFFY

Puzzle 239

The two 7-letter words are FLOWERS and FOWLERS

FEW	FLOWERS	FOWLERS	LOWERS	OWLS	SLEW	SOWER	WOLF
FLEW	FLOWS	FOWLS	LOWS	ROW	SLOW	SWORE	WORE
FLOW	FOWL	LOW	OWE	ROWS	SLOWER	WOE	WORSE
FLOWER	FOWLER	LOWER	OWL	SEW	SOW	WOES	

Puzzle 240

The 7-letter word is COMFORT

COMFORT	FORM	MOOR	ROC	ROOT
CORM	FORT	MOTOR	ROO	ROT
CROFT	FRO	ORC	ROOF	TOR
FOR	FROM	ORT	ROOM	TORC

Puzzle 241

The 6-letter words are GROANS, MORGEN, NEGATE, ORANGE, and ORGANS
The 7-letter words are GRANTEE and MORGENS

AFT	EGO	GAS	MOAS	OAR	RANT	TAGS
AGAR	ENS	GATE	MOAN	OAT	ROAN	TAO
AGATE	ETA	GENT	MOANS	OGEE	ROANS	TAU
AGE	FAT	GET	MOAT	ORANGE	ROE	TAX
AGENT	FATE	GOAT	MORGEN	ORGAN	SAG	TEA
AGO	FAX	GRAN	MORGENS	ORGANS	SAGA	TEAT
ANT	FEAT	GRANS	NAG	RAG	SAGE	TEE
ANTE	FEE	GRANT	NAGS	RAGA	SAGO	TEEN
ARM	FEET	GRANTEE	NEAT	RAGE	SANE	TEENS
ATE	FEN	GROAN	NEE	RAGS	SANG	TEN
AXE	FENS	GROANS	NEGATE	RAN	SARGE	TENS
EAT	FETE	GROAT	NET	RANG	SNAG	TUFT
EFT	GAR	MOA	OAF	RANGE	TAG	

Puzzle 242

The 7-letter word is BASENJI

ABASE	AYE	BLASE	LAB	NABS	SLAB
ABLAZE	BALE	BLAZE	LABS	NAE	SLAY
ABLE	BALL	EASE	LANE	NAY	YEA
ABS	BALLS	ELAN	LANES	RYE	YEAS
ALAS	BALSA	ELL	LAY	SABLE	YEN
ALB	BAN	ELSE	LAZE	SALE	YES
ALE	BANE	ENABLE	LEA	SANE	ZEAL
ALL	BANJO	EYRIE	LEAN	SAY	ZOEA
ALLAY	BASE	INLAY	LEASE	SEA	
ALSO	BASENJI	JEAN	LEI	SEAL	
ANY	BAY	JELL	NAB	SEN	

Puzzle 243

The 9-letter word is HICKORIES

CHI	ENS	LOINS	POI	SCOW	WHIP
CHIP	HICK	LOSE	PONIES	SENIOR	WHY
CHLORINE	HICKORIES	LOW	POSE	SENIORS	WICK
CLOSE	HICKS	LOWS	POW	SIN	WICKS
CLOWN	HIP	NOS	RINSE	SINE	WOK
CLOWNS	ICY	NOSE	RISE	SIR	WOKS
COIN	ION	NOW	RISEN	SIRS	WON
COINS	IONS	ONE	ROC	SNOW	WORK
COIR	IRK	ONES	ROCS	SOCK	WORKS
COL	IRKS	ORISON	ROCK	SOCKS	WORSE
CORK	KRIS	OWN	ROCKS	SON	WORSEN
CORKS	LOCH	OWNS	ROSE	SOP	
COS	LOCI	PICK	ROSIN	SOW	
COSINE	LOCK	PICKS	ROW	SOWN	
COW	LOCKS	PION	ROWS	SOWS	
COWS	LOIN	PIONS	SCION	SWOP	

Puzzle 244

Number 1:

ADO	DUO	GOURD	RAD
AGO	GAD	GRAD	RAG
DOG	GAR	GUAR	ROAD
DOOR	GAUR	GUARD	ROD
DOUR	GOAD	OAR	ROO
DRAG	GOD	ODOR (and ODOUR)	ROOD
DRUG	GOO	OUD	RUG
DUG	GOOD	OUR	

Number 2:

ERG
GREY (Canadian spelling)
GYP
GYRE
HER
HEY
HYPE
HYPER
PEG
PEP
PER
PREP
PREY
PRY
PYRE
REP
RYE
YEP

Number 3:

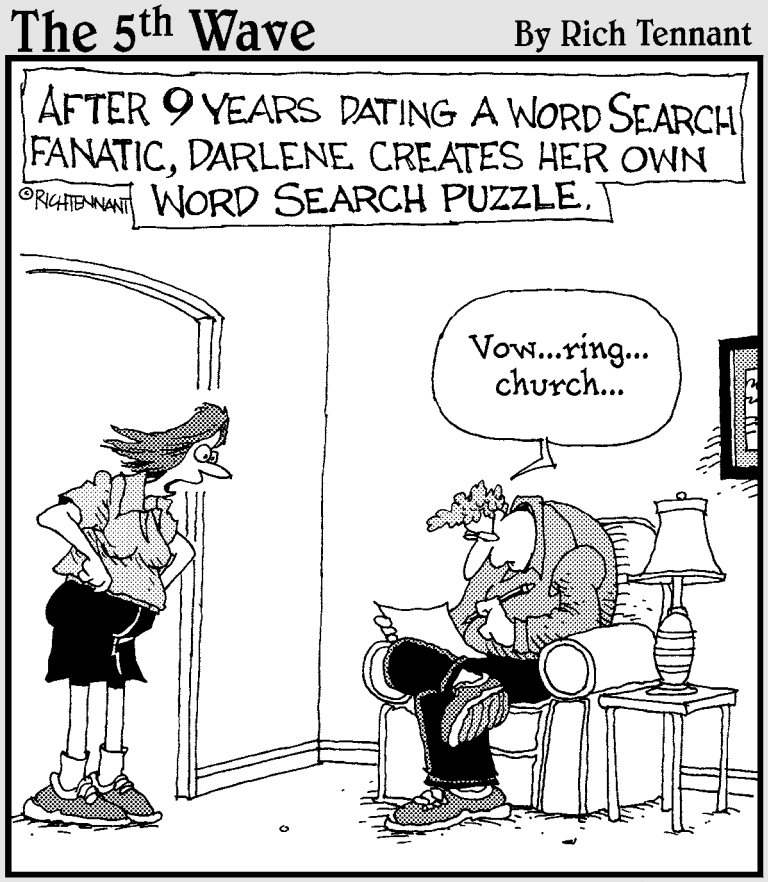
Part V
The Part of Tens



The 5th Wave
By Rich Tennant
AFTER 9 YEARS DATING A WORD SEARCH FANATIC, DARLENE CREATES HER OWN WORD SEARCH PUZZLE.
©RICHTENNANT
Vow...ring... church...

"How are you doing? Are you *gettin'* any of those?"

In this part . . .

There's an unwritten — no, actually, it's a *written* rule — that every *For Dummies* book has a Part of Tens, and this book is no different. In this part, you can discover the letter patterns that frequently occur in English, how solving word searches can benefit you, and even how to write your own word search puzzles!

Chapter 14

Ten Letter-Pattern Tips

In This Chapter

- Discovering ten common features of English
- Finding out a little about letter frequency analysis
- Putting letter frequencies to use in puzzle solving

People have been writing codes and ciphers for as long as writing (and hiding secret messages) has been around — thousands of years. The science of encoding and decoding codes and ciphers is called *cryptography* (or *cryptology*), from the Greek for "hidden writing."

In this chapter, I introduce you to ten different aspects of English that can help in puzzle solving. Although you can certainly get by without knowing about letter patterns, this information can take your puzzle solving and word game skills to a new level.

Understanding cryptography

To better understand cryptography, you first need some very brief definitions:

- A *cipher* encodes a message by mixing up or replacing its letters. In a *substitution cipher,* each letter in the alphabet is encoded by one symbol. For example, the letter *E* may be encoded by an *S,* an *8,* or a ♣.
- A *code* is effectively a language. *Whole words* are encoded, often by a single symbol, word, or signal. So the word *cupcake* may be encoded as *314, blue,* or ♦ (because, you know, there are all those secret messages flying around out there about baked goods).

As you can see, cracking a code is much more difficult than solving a cipher — you've really got to steal the codebook to figure it out.

Letters by Frequency

Letter frequency analysis is a statistical method that provides an effective way to crack substitution ciphers. When you use letter frequency analysis to crack a cipher, you simply count how many of each symbol appear in a section of encoded text. If it's English, you can be fairly certain that the four most commonly occurring symbols are *E, T, O,* and *A* and that *E* is your most frequently seen letter. Then you look at things like commonly occurring pairs of letters *(digraphs)* and short words. The process is very involved if you're a professional cryptographer, of course, but you don't need to worry about the complicated version for your puzzle solving needs.

If you can remember even *some* of this information, you can bring it into play when searching for words within word search grids, solving anagrams, and looking for words in word games.

No one can compile the definitive list of the frequency of letters in English (or any language) because this list changes depending on which texts a person has pulled apart and analyzed. I've chosen one list for you, to keep things less confusing, but if you're interested in finding out more, you can discover more online or in a book on cryptography.

You read the list from left to right, from most frequently used letters to the least. I've broken it into five-letter groups (and six at the end) just to make it a bit easier for you to read. So here it is — the frequency of letters in English:

ETAON RISHD LFCMU GYPWB VKXJQZ

This information is crucial when you solve cryptogram puzzles, crosswords with no clues, and other ciphers. It is also helpful when you're looking for solutions to anagrams and playing word-based games like Scrabble, Boggle, and Hangman.

You can also use letter frequency knowledge when solving word searches. A good strategy is to search for the less frequently used letters within a word rather than a more common initial letter. For example, search for NIRVANA in a letter grid by looking for the rare *V* rather than the more common initial letter *N*.

You can also expect that words consisting of the most common letters, such as TENANT, NEATEN, ANTENNA, and ENTREAT, will be harder to find in letter grids because these letter occur so frequently in the grid.

Eh-tay-oh-in shird-loo and other tales of letter frequency

ETAOIN SHRDLU is a famous frequency distribution of the most popular 12 letters in English, associated with the first Linotype machines (and with the mnemonic device in this sidebar's title), but it's not the only ranking uncovered by people who probably had far too much time on their hands.

The Brown Corpus (one million words carefully chosen in the 1960s) gives the top ten letters in American English as ETAOI NSRHL. If you break down the literary classics, you get results such as ETAOI NHSRD *(Pride and Prejudice)* and ETAOI HNSRD *(Alice in Wonderland)* — very similar!

In more recent times, others have sampled several gigabytes of Usenet traffic (ETAOIN SRHLDC), or the word list (including hyphenated words and phrases) from Webster's Unabridged Dictionary (EAIRON TSLCUD). Another popular listing (and the one I've always remembered) is ETAON RISHD — it's the one I use in this book.

Different writers and subjects yield different letter frequencies. These discrepancies can even help figure out whether someone is really the author of a piece or not!

Different languages have a different spread of letters, as you may expect, so if you're practicing your French vocabulary in Hangman, the top 10 letters to focus on are ESAIT NRULO.

According to various analyses, German's letter distribution comes in as ENRIS TUDAH and Italian has AEIOL NRTSC; *all* languages have different letter frequencies.

As you can see this topic gets incredibly complicated very rapidly! *E* is clearly English's most common letter, but the finer details of letter frequencies are the realm of the cryptologist.

Common First Letters

The 12 most common starting letters in English text (in descending order) are TAI SOW CMB PHD. This order isn't a reflection of how many words in the dictionary start with *T* — *S* is the leader there. Being the *most common starting letter* means that more words start with *T* than with other letters in any given piece of English writing. A letter's popularity has to do with repeated usage; *to, that, this, the, there,* and so on are very popular words!

This information about first letters is very handy when you're playing games such as Boggle or Scrabble, looking for words in a Secret List Word Search, or cracking a cryptogram. When you're searching for new words in anagram-type puzzles and games (such as the ones in Chapter 11), look through the letters in play — on tiles, on the board, or written down — for these common starting letters. You can also test the encoded words in cryptograms against this list.

Common Last Letters

The 12 most common ending letters in English are EST NDR YOL AFG.

If you're very good at anagram-based games, you can work backward from a last letter to the start of the word! This information is also helpful when solving cryptograms.

When solving anagrams and scrambled word puzzles, try putting some of these letters (especially *E, S,* and *T*) in the end positions, to see if that helps solve the puzzles. For cryptograms, look for patterns in the encoded symbols that appear as final letters, and see if these common ending letters fit the bill.

Follow Me: Common Letter Sequences

If you can remember which letters are most likely to follow others, you'll be faster at playing games like Boggle and Scrabble and cracking anagrams and ciphers. Knowing which letter patterns to follow in a grid and which ones you can safely ignore can also speed up your word search play. Keep the following patterns in mind:

- *Q* is always followed by *U* — well, almost always; a few Arabic and Chinese words such as *qanat* and *qigong* are slowly entering the English language.
- If you have a vowel, the consonant that most often follows it is *N;* AN, EN, IN, ON, UN — they're all popular!
- *E* is most likely to be followed by *R, S, N, D,* or another *E.*
- *T* is most likely to be followed by *H, E, I, O,* or another *T.*
- *O* is most likely to be followed by *N, F, R,* or another *O.*
- *N* is most likely to be followed by *D* or another *N.*
- *R* is most likely to be followed by *E* or another *R.*
- *I* is most likely to be followed by *N.*
- *S* is most likely to be followed by *T* or *S.*
- *H* is most likely to be followed by *E* or *I.*

Two's Company: Digraphs

Pairs of letters that form one sound are called *digraphs* (or *bigrams*). If you can remember the more common ones, they can give you a boost when cracking ciphers, solving anagrams, and playing many word games, from word searches and crosswords to board games.

Here is a list of the more common ones (roughly) by frequency:

TH, HE, AN, RE, ER, IN, ON, AT, ND, ST, ES, EN, OF, TE, ED, OR, TI, AS, and TO

Other digraphs to keep in mind are

AE, AU, BL, BR, BY, CH, CK, CL, CR, DL, DR, EU, FR, FL, GH, GL, KN, LM, MP, NC, NG, NS, OU, PH, PR, PY, RD, RF, RV, SH, SW, TW, US, VR, WN, WR, ZY, and a whole lot more!

Make That Three: Trigraphs

Trigraphs, or sets of three letters that make one sound, are common in English words. Knowing some of these trigraphs (also known as *trigrams*) can help you find better anagrams, tricky words in Boggle, and great moves in Scrabble!

The following are the top ten most frequent trigraphs:

THE, ING, AND, ION, ENT, FOR, TIO, ERE, HER, and ATE

A few (of many more) trigraphs to remember:

ANT, ART, AST, EDT, NCE, NCY, NDE, NGL, OFT, SCH, SCR, SHR, SPR, SQU, STH, THA, THR, TIS, and TRY

Double the Fun: Double Letters

Double letters are a great way into word searches — they're usually easy to spot in the grid. They're also very helpful when solving cryptograms and anagrams!

The most commonly occurring double letters in English, from most to least common, are LL, EE, SS, OO, TT, FF, RR, NN, PP, and CC.

Common Prefixes

These prefixes are handy to remember as good word-starters when playing any anagram game. They're very useful for extending words, so they're perfect when you're playing games like Boggle, Upwords, and Scrabble. Here's a list of some common English prefixes:

UN, RE, IN, IM, IR, IL, DIS, EN, EM, NON, OVER, MIS, SUB, PRE, INTER, DE, FORE, TRANS, BE, ANTI, SUPER, SEMI, ANTI, MID, UNDER, CO, OUT, AN, AB, AD, TRI, BI, NEO, COM, EX, BE, ANTE, CONTRA, DIA, EXTRA, HEMI, HYPER, HYPO, PERI, POST, ULTRA, and SYN

Common Suffixes

Use suffixes to extend words, especially in games like Boggle, Upwords, and Scrabble. If you have a base word such as *hand,* you can make *handful, handier,* and *handy.* Some common English suffixes include the following:

TION, AL, ENT, IVE, LY, ITY, ER, OUS, NESS, DOM, IZE, FUL, FY, EN, IC, MENT, ISM, ATE, SION, ABLE, Y, ANCE, SHIP, ENCE, AGE, LESS, ERY, OR, EST, IST, ACY, and BLE

Common Consonant Patterns at the Beginnings of Words

These vowel-free digraphs often appear at the beginnings of words. They can help you find words in Secret List Word Searches, solve cryptograms, and beat your opponents in various word games. Common consonant combos (say *that* three times fast) include ST, SH, STR, SP, TR, TH, PR, CH, and CHR.

Everyday cryptography

You may think that the information in this chapter doesn't have much impact on you, apart from improving your puzzling skills. However, millions of people rely on high quality encryption every day, not just secret agents and governments. Cryptography is a thriving field of research and development.

Every time you make an online payment, very complicated and advanced digital encryption is used to ensure your transaction is secure. The SSL (Secure Sockets Layer) protocol is currently widely used. If the Web site has `https` as the prefix rather than `http`, you're protected by SSL security. Also look for the little lock symbol in the corner of your browser's menu bar. Make sure it's closed (not open) before sending any personal or credit card details!

And while I'm talking about online security, please, never *ever* send your personal, credit card, or online account details to *anyone* (not even your mom) in an e-mail. Sending an e-mail is like sending a postcard; the mailman, the government, or someone unscrupulous (or all three) can read it along the way.

Chapter 15

Ten Benefits of Doing Word Searches

In This Chapter

- Improving your word power
- Having fun and relaxing

Solving word searches has some real benefits, so I advocate carrying a book of puzzles with you at all times! This chapter shows you why this recommendation isn't as crazy as it sounds.

They're Portable Boredom-Busters

Word searches are one of the best portable puzzles. You don't need a dictionary, a thesaurus, or online resources, and you can probably even get away without needing an eraser! Pop a book of word searches and a pen into your bag or briefcase. Any time you're kicking your heels or the kids are acting up, you're ready to entertain yourself or them.

They Keep Your Brain Active

A lot of evidence suggests that staying mentally active helps to stave off dementia. If nothing else, doing word searches helps you stay interested in and involved with the world around you. See Chapter 1 for more information.

They Increase Your Vocabulary

Vocabulary-building is one of the biggest benefits of solving word searches. Didn't know *urad* was a type of bean until you saw it in a bean-themed word

search? Now you do! Word searches are also great if you want to become more familiar with the jargon of a new field. Make a list of words you want to add to your repertoire and use them to create your own word search. Chapter 16 tells you how to write your own puzzles.

They Help You Learn New Languages

If you're learning a second, third, or seventh language, word searches are a great way to practice your spelling and add to the lists of words you know. Try making a word search puzzle (using the directions in Chapter 16) of your weekly vocabulary goals.

Word searches are also a very valuable tool for the brave souls faced with the almost impossible task of learning to speak and read English as a second language. It is one of the most confusing languages of all time with so many spelling variants, unusual pronunciations, and irregular forms.

They Help You Gather Knowledge in a Way that Makes Sense to You

A popular educational theory (sometimes called *multiple intelligences*) states that different people learn in different ways. This theory outlines eight different types of learners; three of these learning types are particularly well suited to word searches:

- *Linguistic* or *verbal* learners are word smart — they learn best by reading and listening.
- *Visual-spatial* learners are picture smart, thinking in pictures.
- *Logical-mathematical* learners are number and reasoning smart and are very good at pattern-seeking and logic.

Word searches are particularly well suited to these learning styles, because they focus on words, letter shapes, patterns, and systematic grid-scanning.

They Let You Relax and Have Fun

No doubt about it — having fun is good for you! If the troubles of life are becoming too much, break out the puzzle book and take your mind somewhere else for a few minutes. Word searches are great for this because they're easier than other word puzzles. They aren't too demanding if you're

not up to something hard, but they're still a mental challenge. If you're in the 10 percent of people who struggle with dyslexia or another literacy challenge, this nonthreatening test is especially nice. Even if you're a bad speller, you don't have to give up word searches.

Life has many problems to solve, both large and small, from what to cook for dinner to how to live more lightly on Earth — and they don't always have clear-cut answers. Solving *something,* even just a word search, and being confident that you *can* solve it is satisfying.

They Sharpen Your Spelling Skills

Word searches are a great way to improve your spelling. You need to know how to spell to do a crossword, but a word search can actually help you *learn* to spell better by actively looking for the set of letters in order.

Looking at the search words in close detail in the list and then searching for them letter by letter in the puzzle helps to cement their spelling in your brain. You don't do this kind of deconstruction when reading normally, and it really helps in remembering details of spelling. Word searches don't feel like work, so they're especially good for encouraging children to practice spelling without feeling like it's hard work.

They Train Your Brain to Recognize Patterns

Pattern recognition — the ability to identify letters, faces, and all manner of objects — is a basic cognitive skill (the others include such useful gems as decision-making, focus and concentration, memory, problem solving, and categorization). It's the process of matching your memory to what you're seeing and is a vital skill in reading, among many other things.

Humans can recognize any letter, whether it's a different size, strange typeface, color, handwritten, or drawn at an angle, which is pretty remarkable when you stop to think about it. In Figure 15-1, you probably recognize each of the characters as being the letter *K* even though they all look different.

Although these recognition processes happen quickly, achieving accurate recognition without having to even think about it takes a *huge* amount of practice. Solving word search puzzles can be a fun part of this practicing. The benefit is in having to focus on finding a particular shape (say, an *M*) within the confusing grid of shapes (the letters, that is). Scanning up and down the columns of letters searching for that particular letter pattern

helps to train the brain to recognize the shape, name it, and then key into it. This practice is great for those new to the English alphabet, as well as for people recovering from strokes or brain injuries.

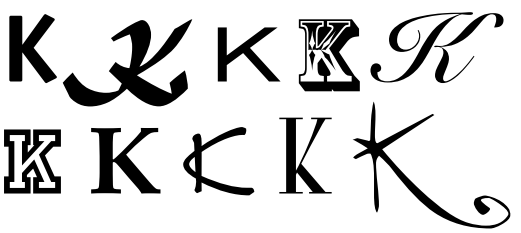


Figure 15-1: Pattern recognition tells you these letters are *K*s despite their visual differences.

They Help You Overcome Insomnia

You know what it's like. You can't drop off to sleep in the first place, and then when you finally do, you wake up in the middle of the night. Your brain keeps going over and over all those problems, which seem so much worse at 3 a.m. In these dire circumstances, reach for your word search puzzles.

Solve a simple word search puzzle or two at bedtime, or in the middle of the night when insomnia is plaguing you. This gentle mental activity pulls your thoughts away from those worries. It doesn't matter if you drop off to sleep in the middle of the puzzle. There's no plot or exciting story to be drawn into, and no complex concepts to come to grips with. The puzzle distracts your mind, helps you relax, and slip into longed-for sleep. Keep a volume of puzzles and a pencil by your bed — no doctor's prescription required.

They're a Way to Spend Quality Time with the Family

Word searches are one of the few puzzles that kids and adults can easily do together on an equal footing. So when the grandkids are visiting, or you're all stuck in a tent while the rain keeps pouring, get out a book of word searches (oh look, you've got one in your hands already!), and settle down to solve the puzzles together. It's always nice to be able to do something so satisfying and simple together!

Chapter 16

Ten Steps to Help You Design Your Own Word Search

In This Chapter

- Picking up puzzle writing skills
- Improving your vocabulary and spelling effortlessly

Do you want an even bigger mental challenge than just solving a puzzle? How about writing one of your own? A word search is a relatively easy puzzle to write, and a good place to start if you're new to this lark. A small word search can take as little as an hour to create.

You can find free word search generators online, and you can purchase inexpensive software programs that create word searches for you. Although these programs create the puzzles quickly, the puzzles are often predictable, mediocre, and poorly designed. And, face it, you aren't getting a mental workout by plugging words into the software program.

You can come up with a better puzzle — and exercise your brain — by creating one yourself. Writing a word search is also a very good educational exercise for kids, but don't tell them that! Using the steps outlined here, you may be surprised at how quickly you can create a puzzle of your very own. And you may find doing something *without* a computer for a change to be very satisfying.

Step 1: Choose a Theme

Your first task is to decide what purpose and/or theme you want for your puzzle. You don't *have* to have a reason or a theme, of course, but it does make the word selection more interesting. Some ideas:

- Helping your kids learn their spelling lists or supplementing a homeschooling project
- Practicing vocabulary for a new language

- Creating personalized gifts or fun cards for friends and family
- Exploring topical subjects, local politics, or history
- Commemorating holidays and other celebrations

Step 2: Gather Your Words

I admit it, this step is my favorite part of writing word searches, but then I am a bit weird. You have to keep only a couple of points in mind here:

- **Gather a *lot* more words than you think you need — at least twice as many.** A 13 x 13 word search generally has about 15 to 20 words in it, so collect 30 to 40 words for a puzzle this size, if possible.
- **Avoid three-letter words as much as possible.** Aim to have your shortest words four letters long. Lots of three-letter words are accidentally created in any letter grid, and you'll end up with unintended duplicates if you use many short words.

  If some *high quality* words (important on-topic words) are three letters long, include them by all means, but make sure you check the grid carefully to ensure these short words haven't been accidentally duplicated. The later section "Check and Recheck the Puzzle" has more detail on how to search for duplicates.

Let's say you're writing a word search for your dad's birthday. Make a long list of any words relating to his family, career, and life: favorite hobbies, sporting teams, music, books, foods and drinks, pets, and so on.

Include variations on key words, such as shortened versions of names and nicknames (JENNIFER, JENNY, JEN, JAY RAY) and different forms of nouns and verbs (SONG, SONGS, SING, SINGS, SINGING, SANG, SINGER, SINGERS). Also use made-up family words if you're going for the silly option. (I thought *everyone* said "killerpillers," but apparently it's actually "caterpillars." Who knew?)

Write the master word list as you go, either handwriting the words on a piece of graph paper or typing them in a monospaced typeface such as Lucida Console or Monaco (head to "Make It Pretty" later in this chapter to find out more about monospaced typefaces).

Make sure the words in your master list are all lined up so you can easily see the letter patterns. This trick helps you quickly see which letters come first, second, third, and so on in each word and how long each word is. It makes your task of filling in the letter grid *much* easier. This strategy highlights words

good for overlapping. You can quickly scan your word list for a particular pattern, such as "something, something, *A*, something, something, *T*," or to find any word that has *L* as the third letter. Figure 16-1 gives you an example — you can clearly see the third letters of each word by reading down the columns.

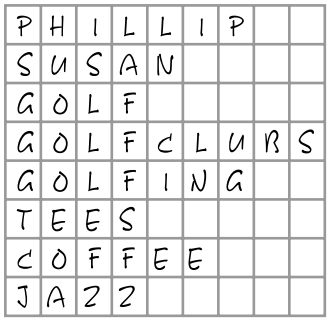

Figure 16-1: Write out your working word list in a grid or mono-spaced typeface.

Step 3: Make the Big Grid Decisions

Decide on your grid size and rough difficulty level. You can make your grid any size, really, but a *very* small grid is harder to fill because you don't have as much wiggle room to fit all your words in. I recommend trying a 13 x 13 grid for starters, and then creating smaller and larger grids as you get more experienced.

An easier word search (for the solver) has a smaller grid, shorter word list, and not so many backward or diagonal words. If you're writing the puzzle for children, adjust the word list to be age-appropriate.

Step 4: Assemble the Tools of the Trade

Word searches are quite straightforward to write as well as solve. Your equipment list is small:

- Graph paper (quarter inch grid is a good choice)
- Nice paper (for your finished copy)
- Ruler
- Pen, pencil, and eraser
- Highlighter (optional)

You may find it helpful to have an outside resource for finding words that fit into your puzzle. You can search for extra words by using online tools; my favorite is OneLook Dictionary Search (`www.onelook.com`). You can search for letter patterns to fit your grid and specify a theme, which is extremely helpful.

Step 5: Just Add Words

Now the fun starts — time to put those words into the grid! Place your longest and highest-quality words first. Progress from long words to shorter words as you put the puzzle together. Place diagonal words and words in the puzzle corners early on and gradually fill in the spaces around them. Bunches of words that run in the same direction are easiest to place. It's harder to put a mix of word directions within the grid.

Scan through your master word list (see Figure 16-2 for an example) to find letter patterns that can overlap in the grid. An easy way to get some overlap is to have a word start on top of a letter within another word. Try to avoid crossing over letters in the grid more than twice in an easy-level puzzle. If you're writing a really tricky puzzle, overlapping a letter three times is okay.

P	A	N	C	E	T	T	A	
A	N	T	I	P	A	S	T	I
M	A	C	A	R	O	N	I	
P	A	S	T	A				
G	N	O	C	C	H	I		
T	R	O	C	C	O	L	I	
A	R	A	N	C	I	A		
L	A	T	T	E				
L	U	M	A	C	H	E		
G	E	L	A	T	O			
A	M	A	R	E	T	T	I	

Figure 16-2: Scan this sample master word list before you start adding words to the grid.

Make a special note of the three- and four-letter words you place. You can mark the positions of the placed words in highlighter if you like. This strategy can help you keep track of which words you've placed and where they are (trust me, it gets confusing pretty quickly). The downside of this technique is that any marks you make aren't easy to erase if you remove a word from the grid.

If you need to fill a position but don't have a word from your master word list that fits, check out an online resource such as `www.onelook.com`. If one pattern doesn't yield a good word, delete one letter at a time from the search parameters until you do get a good match (for instance, start with _ _ C_ _ _ T_, and then go to _ _C_ _ _T, and then _ _C_ _ _, and so on).

If you add extra words to your puzzle from such sources, make sure you add them to your master word list so the final word list is accurate. You don't want to have words in the letter grid that aren't in your word list, or — even worse — words in the word list that aren't in the letter grid!

Figures 16-3 and 16-4 show an example of placing words in an *Italian Foods* word search. Start with PANCETTA — it's a long word, so place it on the diagonal.

Time for the second word. ANTIPASTI, a nine-letter word that has *T* as the third letter (_ _T _ _ _ _ _ _), fills in nicely.

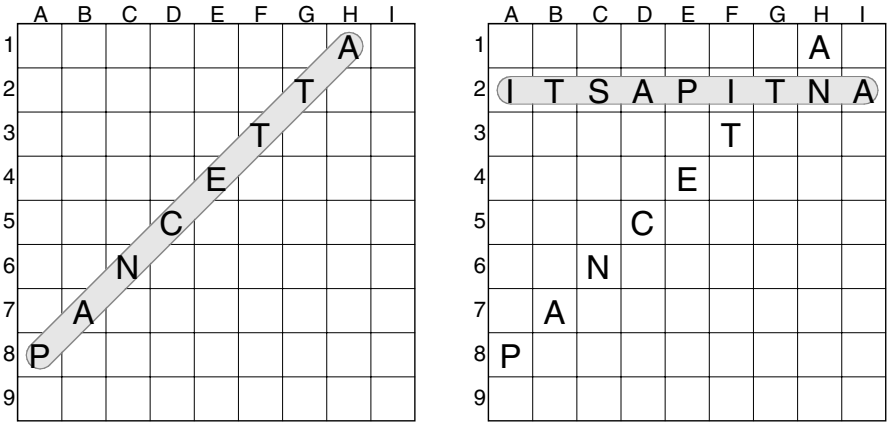

Figure 16-3: Placing the first two words in a word search.

You've got plenty of room, so try running the third word on a diagonal. You don't need to overlap any letters, so it's easy to place, but you want it to be at least five letters long. GNOCCHI works well, so in it goes!

You still have room to run another diagonal word alongside GNOCCHI, coming up from the other direction. It needs to start at position (H, 8), (G, 7), or (F, 6). (The coordinates pinpoint squares in the grid — the letter refers to the column and the number refers to the row. See Chapter 12 for more information on the coordinate system.)

The word will overlap the C in PAN**C**ETTA; it can overlap the final *I* in ANTIPAST**I**, but it doesn't have to. I've marked the position in Figure 16-4 with shaded squares.

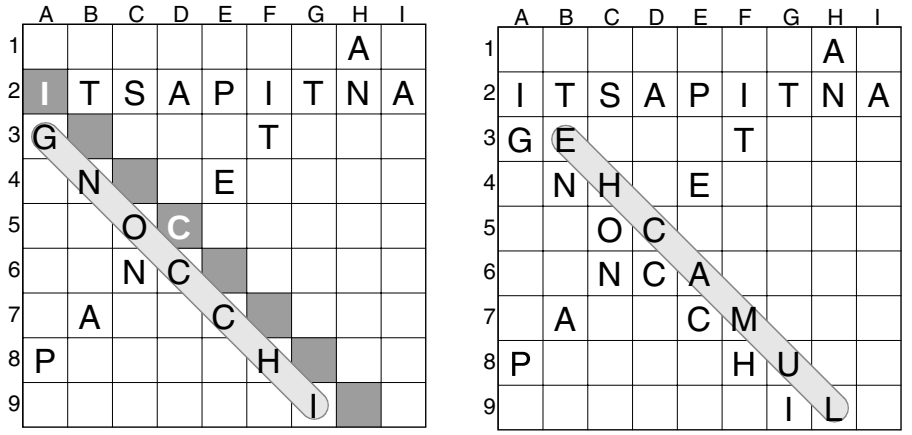

Figure 16-4: Placing the third and fourth words.

So you need a word from your master list of Italian foods that can fit somewhere within the pattern _ _ _ _ C _ _ I.

Several options in the master word list (including TROCCOLI and ARANCIA) work here, but I like the sound of some snail-shaped pasta, so that's what you're picking (not to be a tyrant or anything). LUMACHE fits the bill nicely — this word overlaps the *C* but doesn't use the *I*.

If you can't find a word to fit in a space from one direction, see whether you can get better results by trying from the opposite direction. You'll have more luck finding a word for the pattern _V _ _ E than E _ _ V _ , for instance.

Don't duplicate words, or have short words that are contained within longer words in your word list — so don't put the word CART in the grid as well as **CART**OON.

You're going well if you can fit 15 to 20 words into a 13 x 13 grid (169 squares). A 17 x 17 grid (289 squares) can easily hold 25 to 30 words.

Step 6: Ponder the Punctuation

Don't include punctuation, spaces, or accents in the letter grid. The only exception to this rule is if you were writing a word search in a foreign language that uses additional characters. For example, a Danish word search would include the additional characters Æ, Ø, and Å.

However, include any punctuation, spaces, and accents in your word list. For example, if you were doing a word search of Beatles song titles, you would put BABYYOUREARICHMAN in the letter grid, but you'd write it as BABY YOU'RE A RICH MAN in the word list.

Step 7: Erase and Change as Needed

Be prepared to remove words, and change the grid if things don't fit as well as you want. The eraser is your friend!

If you remove a word from the grid, be sure to check for words it overlapped. Don't remove the overlapping letters, or you'll screw up the other word as well. Also, reinstate the deleted word on your master word list to make it available again.

Sometimes you have words that you really want to include in the puzzle but that screw up the pattern and prevent other words from going in smoothly. Either be brave and restart the whole puzzle, putting these cherished words in first, or remove the words from the puzzle altogether.

When you're happy with the placement of your words, write over them in ink (or make a copy of the puzzle in ink). In the master word list, highlight or otherwise mark the words you used.

Step 8: Fill in the Grid

After you get your words into the letter grid, it probably has some gaps. That's when you complete your grid with *fill,* the mostly random letters that complete the puzzle.

To add random letters, refer to the letter pattern lists in Chapter 14 for the most common letters in English or just repeatedly write the alphabet randomly into the blank squares until you fill them all in.

If you want to make the puzzle harder, avoid adding fill letters that you haven't used in the word list. In other words (no pun intended), if you don't have any words containing a *Q* in the puzzle grid, don't put a *Q* in the fill. Generally, this strategy means you just have to keep tabs on *J, V, X, Q,* and *Z.*

Step 9: Check and Recheck the Puzzle

Check the grid for duplicates and rude words. I'm not going to sully these lily-white (okay, beige-ish) pages with the list of common swear words and other offensive terms, but you know the ones I mean.

Search through your finished word search letter grid for any three- or four-letter words you want to avoid and for duplicates of the short words from your word list. Scan the grid twice, row by row and then column by column.

Your three-letter words are the biggest repetition hazard, followed by the four-letter words. Although you can get duplicates of longer words (or find longer rude words), that scenario is very unlikely.

If you do come across a problem — a duplicate, or a (gasp) rude word — you can nearly always correct the grid by changing just one or two of your random fill letters.

Step 10: Make It Pretty

After you compile and test your puzzle, you're ready to prepare the artwork! You can create your final puzzle in one of two ways: using a computer or drawing it up by hand.

The following sections give you information on both of these methods. The main thing to be aware of with either technique is making sure that the letters all line up.

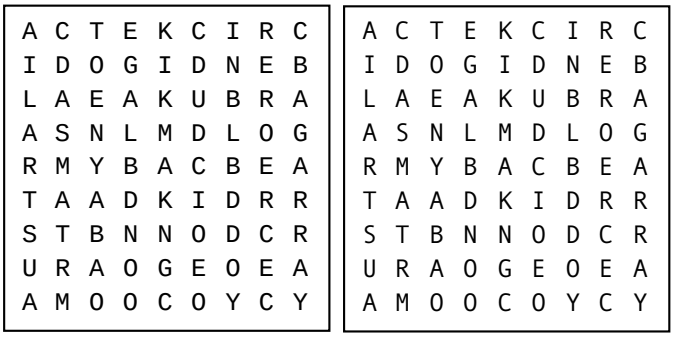
Using a computer

Here's how to draw the puzzle in a word processing program, such as Microsoft Word:

Open a new document and transcribe your word search into the file row by row. Use your ruler as a guide to read along your handwritten copy.

To get a good grid layout, you need a bit of space around the letters. One space between each letter and 1.5 line spacing can work well. You may want to muck around with tab settings, too.

Monospaced typefaces make the layout job much easier. *Monospaced typefaces,* also called *fixed-width* or *nonproportional typefaces,* fit every letter into the same amount of space. So an *I* takes up the same room as an *M* — which isn't the case in other fonts! The two grids in Figure 16-5 use two different monospaced typefaces (Geneva and Andale Mono).



A C T E K C I R C
I D O G I D N E B
L A E A K U B R A
A S N L M D L O G
R M Y B A C B E A
T A A D K I D R R
S T B N N O D C R
U R A O G E O E A
A M O O C O Y C Y
A C T E K C I R C
I D O G I D N E B
L A E A K U B R A
A S N L M D L O G
R M Y B A C B E A
T A A D K I D R R
S T B N N O D C R
U R A O G E O E A
A M O O C O Y C Y

Figure 16-5: Using a monospaced typeface helps with grid layout.

Andale Mono, Courier, Consolas, Lucida Console, Monaco, and Prestige Elite are all widely available monospaced typefaces, which you should be able to find on your Mac or PC.

The letters in the grid *must* all line up, both by rows and by column, and be roughly equidistant from each other.

Using all capital letters for list words is the convention, although a lower-case puzzle may be good for kids learning to recognize the alphabet.

Writing it out by hand

If you prefer to handwrite your finished puzzle, here's how to go about it:

1. **Draw up a grid the size of your finished puzzle, with one vertical line per column of letters, and one horizontal line per row of letters.**

   You can go about this process in two ways:

   A. **Make your grid in ink or create it in a drawing program on your computer, and print it out.** The inked grid goes under the piece of paper you're working on (lightly tape the two pieces of paper together and lean up against a sunny window).

   B. **Draw your grid in light pencil lines on your paper.** You can erase the lines later.

2. **Using your best and clearest handwriting, write the letter grid out, line by line, with each letter sitting *directly on* the intersecting lines.**

   Figure 16-6 shows an example. This method ensures that the letters all line up properly. You may want to use calligraphy pens or a good black pen.

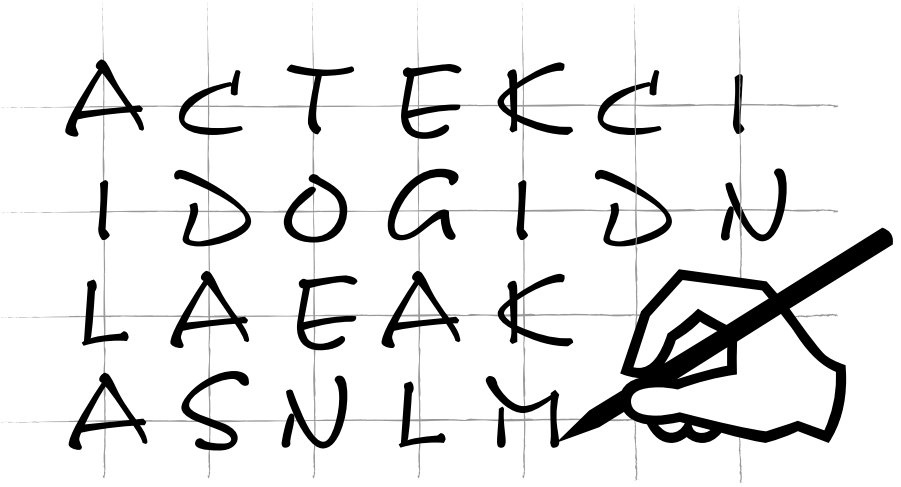


Figure 16-6: When drawing a grid by hand, use a pencil grid to guide placement.

3. **Erase the pencil lines when the ink is thoroughly dry.**

   I mean it — leave it to dry for at least half an hour, even if you've used a felt-tipped pen. Trust me; I've made enough smudgy mistakes for the both of us.

4. **Write out the words in the word list in alphabetical order next to or underneath the puzzle.**

   Keep the case the same — if you've written the puzzle in all capital letters, write the list in all capitals as well.

5. **Decorate the page however you like, and then enjoy the delight of your recipient when he or she receives your hand-crafted puzzle!**

That's all, folks! The end! Go forth and puzzle!
